

# **BAN-AIR™ ADJUSTABLE BEAM RACKING**

## **Features and Specifications**

### **Ban-Air™ Adjustable Beam Racking:**

- STRONG
- HIGHLY FLEXIBLE
- COST EFFECTIVE

108in x 40in (WxD) platform designed to accommodate 2 wooden carrier pallets (US Govt specs) or other pallets of various sizes – see below for details

Storage platforms adjustable in height every 6in for maximum storage capacity

Standard platform takes 6000lbs per pair of beams (uniformly distributed)

Unique locking system requires no fixings for re-adjustment of heights

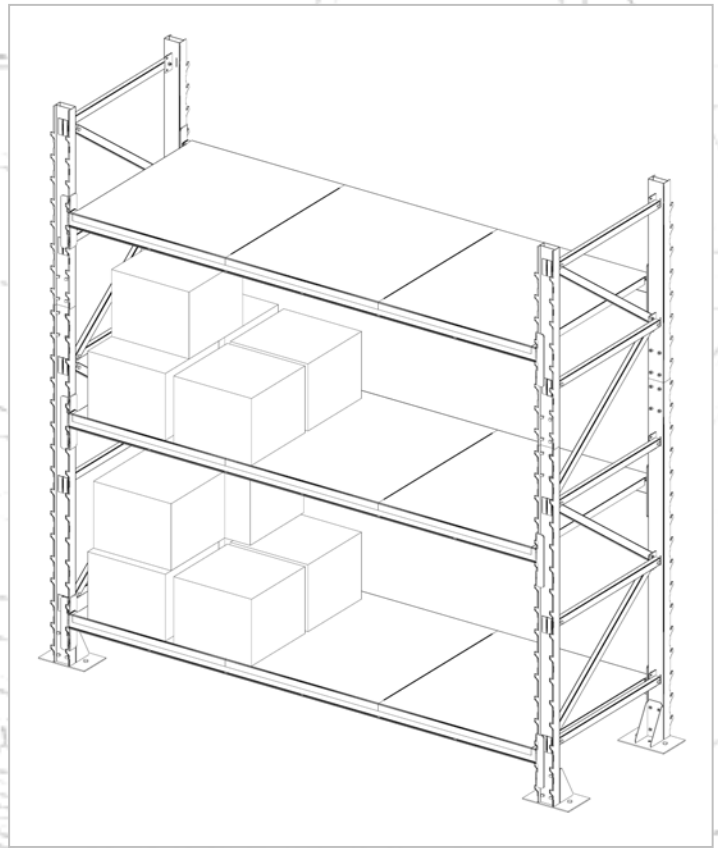

### **High-Density, Versatile Bulk Storage**

- Using Ban-Air™ Beam Racks, you can configure your fixed height loads for **MAXIMUM STORAGE, MINIMUM EFFORT!**

- Pallets instantly accessible for *rapid deployment*

- Heavy-duty steel shelves available for non-palletized goods – reduce your wooden pallet usage!

### Standard Platform (cross braces)

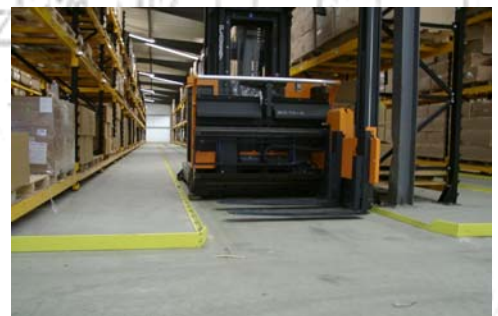

- Prevent possibility of accidental tipping from incorrectly located wooden pallets
- Enable storage of pallets of varying depths
- 'No bolts' fixing facilitate easy relocation
- 108in x 40in platform design to accommodate US Government sized wooden carrier pallets
- Load capacity of up to 6000lbs MAX (uniformly distributed)

### Solid Shelf Platform

- Galvanized steel panels fit neatly over beams to form a heavy-duty, solid shelf
- Platform does not require a carrier pallet to span across the beams – items of any shape and size can be accommodated on the 108in x 40in surface
- Ideal for storage of items difficult to palletize
- Load capacity of up to 6000lbs MAX (uniformly distributed)

SUITABLE FOR USE IN VERY-NARROW AISLE ('VNA') SYSTEMS TO MAXIMIZE STORAGE - seen here with Ban-Air™ forklift guide rails
