Thank you for your interest in SigTech signing machines. A SigTech signing machine can be used whenever you need a personal "Pen & Ink" signature to give your correspondence, awards, diplomas, pictures, books and certificates the "personal touch". The SigTech signing machine can sign virtually anything for you, even when the person whose signature is needed is thousands of miles away.

COST

By eliminating the time a single executive, top manager or VIP signs his or her name by just 15 minutes a day, a SigTech signing machine can pay for itself in under a year. One SigTech signing machine can be used to sign the names of any number of people, reducing the pay back time proportionately.

SECURITY

You can equip your SigTech signing machine with a cycle counter and locks to help insure the integrity of the signature. A locking storage cabinet for your signatures is also available.

DEPENDABILITY

This family run business has over 250 years experience under our belts. Our signature machines have worked nearly trouble free, in many cases, over 20 years. Our economical service agreement guarantees you a perfectly functioning machine no matter where you live in the United States and most of Canada.

SERVICE

All SigTech signing machines come with a full 90-day warranty. An extended warranty can be added on an annual basis. This covers all travel expenses, labor costs and parts (electrical and mechanical). To make sure your SigTech signing machine stays in proper working order, we will automatically schedule a preventive maintenance "tune up" once a year even if your SigTech signing machine shows no symptoms of wear.

Original documentation will be sent today via US mail. This package includes signature samples signed by a SigTech signing machine with a variety of pens.

Shouldn't there be a SigTech signing machine in your office? Please give our sales staff a call and let them know what you think. Our toll-free number is (800) 636-4450. We will be glad to personally answer any questions you have.

SigTech 800

The SigTech 800 pen & ink signature machine is our most popular and versatile model. Designed to be especially user-friendly, this signature machine is excellent for low or medium volume signing on a variety of different items. The operator places document or anything else that needs to be signed over the illuminated signing plate and the machine does the rest. It is ideal for executive offices and management support to get those necessary documents signed and out the door. This versatile signature machine can be adapted to sign books, t-shirts...the possibilities are endless.

SigTech 800 pictured with optional electric lock and casters.

SigTech 4000

The SigTech 4000 pen & ink signature machine does the signing while you take care of other important tasks. This signature machine automatically feeds and signs documents and other items. Its computerized optical scanner enables the signature machine to find the correct place to sign the signature on your document each and every time. Set-up and operation is as easy as the touch of a button. It is ideal for large mailings, diplomas, certificates and legal-sized documents.

Each signature machine requires a signature matrix to reproduce a signature. This signature matrix fits inside the machine and is interchangeable to allow many different individuals to utilize the signature machine. The signature matrix produces a consistent duplication of the signature over and over again. Our signature machines are used by state, local and federal governments, corporations, colleges, prep schools, religious organizations, associations, fundraisers, unions and political groups.

SigTech 4000 pictured with locking casters

- Sign diplomas, letters, pictures... virtually anything!
- Sign with pen and ink, felt tip, fountain pen, pencil, even crayons and sharpies... virtually any writing instrument.
- Locks & covers are available.
- Customers confidentiality is our highest priority!
- Signs up to 3,000 times a day... no writer's cramp!
- Not a phony looking stamp, plotter or laser jet duplication.
- Easy to operate.

SigTech Space-Saver Stand

The SigTech space saver stand is an optional flip stand that replaces the standard pedestal stand included with each signature machine.

Designed to decrease the size of the machine when not in use, this stand decreases the width of the machine from 34" to 26". Casters are included with the space saver stand.

Signature machines equipped with this option can be lowered and wheeled for storage against a wall, into a closet or a utility room. When the signature machine needs to be used, lift up the front of the machine and you are ready to sign.

SigTech Signature Matrix Storage Cabinet

The SigTech signature matrix storage cabinet allows your signature matrices to be stored safely and securely.

- stores up to 14 signature matrices
- padded interior for signature matrix protection
- includes a keyed lock for security
- provides for maximum accessibility control

Options

Keyed Electrical Lock: terminates all power to the signature machine. Prevents operation by unauthorized personnel. (includes 2 keys)

Keyed Mechanical Lock: prevents access to the inside of the signature machine. (includes 2 keys)

Non-Resettable Counter: counts the number number of signatures signed

Resettable Counter: counts the number of signatures signed and may be reset to zero at anytime

Dust Cover: keeps machine dust free and covered when not in use

Casters: locking wheels that fit on the bottom of the 5 star pedestal stand

Indicate which sample is desired by checking the corresponding circle.

Please print the name or phrases as signed above here: _____

Check the box for an inverted signature matrix. (signature will sign upside down)

Special Handling instructions: _____

TIPS FOR A BETTER SIGNATURE MATRIX

- ✍ Sign within the ovals. Anything outside of the ovals will not be recorded.
- ✍ Do not use periods, dots, dashes or extra marks unless absolutely necessary.
- ✍ Connect the letters and names as much as possible.
- ✍ Try to sign with the same pen that will be used in your machine.
- ✍ Larger size documents/materials may require the signature be write upside down. (inverted)

Following these guidelines will result in a better operating, smoother writing, longer lasting signature recording.
