Aorist has provided technical staffing services since 1967. Over the years, we've introduced a variety of new technical services to help meet our clients' changing needs. **The services currently offered are almost limitless** – from architecture to drafting to surveying to programming to testing. And the list of services keeps growing as markets and technologies change.

Such a comprehensive array of services requires a **vast network of talented individuals**. We have worked diligently to construct such a network, and it keeps growing with our ongoing pursuit of the **best-qualified technical personnel in each industry**.

When you contact Aorist, we'll ask you about all of your staffing needs. Do you need a graphic artist for a two-week assignment or a whole team of engineers and drafters for a year-long project? Are you planning to eventually hire our personnel, or would you prefer the flexibility of short-term staffing? Whatever your needs, **we'll do our best to connect you with the best candidates for as long as you need them.** ■
