eFax: desktop faxing made easy. Here's how:

RAPID DOCUMENT DELIVERY™

Today's most powerful and versatile faxing solution.

eFax™ enables today's leading-edge enterprises to take full advantage of existing e-mail systems to deliver and receive mission critical documents — faster, easier, more securely, and much more cost-effectively than typical fax servers or stand-alone fax machines.

eFax works seamlessly with your current PC or network. It makes faxing as simple as typing an e-mail address. Assign client matter codes as easily as selecting from a drop-down menu. And since each user gets a unique 11 digit phone number, tracking usage, creating reports, and billing back costs is now effortless.

Here's how easy it is to use eFax:

To Send:

Attach your document to a new e-mail message, just as if you were e-mailing a file. eFax supports more than 40 different kinds of documents and file formats, from Word and Word Perfect to JPG, GIF, and HTML. Simply address the e-mail with the 11-digit destination fax number followed by @efaxsend.com. eFax will send the fax to the destination fax machine, whether it's stand-alone or computer-based.

To Receive:

Receiving a fax is just as easy. Every eFax user gets a unique local or toll-free eFax number. When senders fax to that number, the fax arrives directly in the destination e-mail inbox as an easily viewed .tif file attachment. You can then view, print, file or forward it with mouse-click ease.

Senders fax directly to your assigned eFax number. You receive it in your e-mail inbox where you can view, print, file, or forward it.

When your fax arrives in your e-mail inbox, just double-click to open it.

Simply address your fax as you would an e-mail using your assigned 11-digit destination fax number followed by @efaxsend.com. eFax will send the fax to the destination fax machine, whether it's stand-alone or computer-based.

Add a digital signature to contracts and proposals, making communications truly paperless.

eFax Messenger Plus puts names, fax numbers, document selection, client matter codes, and more at your fingertips.

eFax Messenger Plus lets you do infinitely more with your documents.

eFax Messenger Plus is an integrated software tool that takes document management to the next level. In addition to enabling you to view the inbound and outbound documents, Messenger Plus lets you:
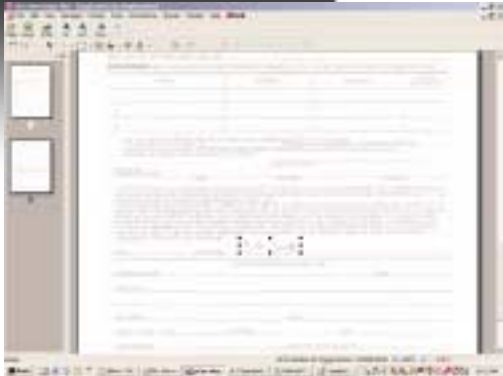

- Sign and annotate faxes digitally

- Combine, re-order, and delete pages

- Add links to Web pages or other eFax documents

- Add client matter codes with the click of a mouse

With this kind of versatility, sending orders to vendors is fast and professional. Receiving orders from customers is efficient and expeditious. Sending and receiving specs and drawings in such industry-standard formats as Visio and CAD Drawing Exchange Format (CXF) saves time and enhances capability. Even sending intra-company communications, such as expense reports and spreadsheets, is secure and reliable.

Easy online account management and reporting.

A powerful Web-based management tool gives you the ability to provision new users with local, international, and toll-free fax numbers, run reports, configure data collection, set user account profiles, assign department codes, and so much more from a single interface. Log on securely from anywhere at anytime and view all account and cost recovery data by client, matter code, department code, or even employee. Or, set up your account so that any number of activity reports arrive in your e-mail box — ensuring you always have the latest data on-hand.

Web-based management allows you to log on securely from anywhere for complete control of your account and data.
