

company overview

machine tools for hi-production operations

Technologically Advanced Machine Tools

Ultra Tech Machinery has over 20 years experience in designing and manufacturing metal forming and metal removing equipment, mainly supplying the automotive and truck manufacturing industry. We offer a wide range of low maintenance, highly efficient equipment designs.

In addition to new equipment building, we also offer retrofitting of existing equipment with the latest technology, and a wide variety of service options.

With the expansion of our operations into a newly acquired facility adjacent to our existing location we now have a total of 28,000 sq. ft. dedicated to machinery building. With dual 10 ton overhead cranes, we have everything necessary to handle new equipment building as well as retrofits to existing equipment.

Engineers at Ultra Tech can evaluate your new equipment needs and develop the best solution to fulfill your production requirements.

ULTRA TECH Machinery, Inc.

Quality from Start to Finish

TE-9000 certification requires the utilization of a team-oriented approach that focuses on each functional aspect of the design and assembly process. Assembly designs and FMEA's, equipment specification, project plans and inspection sheets all help ensure consistent, high quality solutions.

QS 9000 with T&E Supplement
ISO 9001

High-speed CNC Modules - Multiple Module Capability - Flowforming - Vertical Turning - Polishing and Buffing Machines

Company Mission

Creating solutions for the high-production manufacturer requiring the latest in technology and reliability. Each assembly is designed to combine high output and low maintenance. Every solution is tailored for the specific application to achieve optimum efficiency and to maximize the customer's return on investment.

Service and Support

Ultra Tech understands the importance of running an uninterrupted three-shift operation. While our equipment is designed using standard off-the-shelf components, we offer excellent on-site service if the need arises. Customers can count on us to respond in 24 hours or less to any service request. Our goal is to eliminate downtime through top quality equipment and outstanding customer support.

318 Remington Road

Equipment

Ultra Tech has designed and built a wide variety of new equipment over the years. Our current products include:

- High-speed 4-axis CNC vertical turning centers
- 4-axis CNC flow-forming machines
- 12-axis open architecture CNC polishing machines
- 12-axis open architecture CNC buffing machines
- Single or twin module configurations
- Various forms of dedicated and robot automation
- 3 to 6-axis CNC horizontal milling machines
- Automatic PC-based marking units
