All Government Credit Cards Accepted

Cummins has over 50 factory owned and operated sales/service offices - Nationwide.

Customer Information

1a. TABLE OF AWARD

Check Handling (Pages 12 - 13), Perforators (Pages 9 - 11), Coin & Currency Handling (Pages 3 - 7), Shredders (Pages 14 - 15).

1b. LOWEST PRICED ITEMS

50-287 (M-4020, \$678.00), 51-244 (M-505, \$135).

2. MAXIMUM ORDER

All Special Item Numbers are \$750,000.

3. MINIMUM ORDER

\$100.00.

4. GEOGRAPHIC COVERAGE

The price list covers the 48 contiguous states, the District of Columbia, and to ports of embarkation for Alaska, Hawaii, Puerto Rico, and APO/FPO shipping addresses.

5. POINTS OF PRODUCTION

USA, Germany and Taiwan.

6. DISCOUNT

As shown on price pages.

7. QUANTITY DISCOUNTS

The following quantity discounts are for all 50-287 SINs except Options and Accessories:

2-3 Units - 3%

4-9 Units - 5%

10+ Units - 7%.

The following quantity discounts are for all 51-224 SINs except Options and Accessories:

3-4 Units - 2%

5+ Units - 4%.

8. PROMPT PAY TERMS

None.

9a. CREDIT CARDS

All government credit cards accepted.

9b. CREDIT CARDS

All government credit cards are accepted above the micro-purchase threshold.

10. FOREIGN ITEMS

Items herein are manufactured in the USA, Germany and Japan.

11. TIME OF DELIVERY

FOB, Destination - 30 days, with some special order products 1-120 days.

12. OVERNIGHT AND 2-DAY DELIVERY

Available, contact Cummins for pricing and availability.

13. ORDERING ADDRESS

Orders may be placed with any Cummins-Allison office.

14. PAYMENT ADDRESS

Payment should be made to address indicated on the invoice:

Cummins-Allison Corp.

P.O. Box 339

Mt. Prospect, IL 60056

847-299-9550

Fax 847-299-4939

SIC Code 3579

Fed ID. 350145140

DUNS #005069760

CAGE Code: OJE64

NAICS 333313

15. WARRANTY PROVISIONS

All machines are warranted to be free of defects in materials and workmanship under normal use for 90 days labor and one year on parts from date of shipment. All provisions of the current Cummins commercial warranty are incorporated.

16. EXPORT PACKING

Export packing is available for an extra charge.

17. INSTALLATION

Installation, instruction and training of operators is available in the 48 contiguous states.

18. REPAIR PARTS

Repair parts are available on an open-market basis.

19. SERVICE AND DISTRIBUTION

For service call Cummins Federal Office, Home Office or local Cummins office.

20. CCR REGISTRATION

Cummins is CCR registered.

JetScan Currency Scanners

Processing 1,500 bills per minute, JetScan provides unsurpassed accuracy. Lightweight and designed to be moved easily for maximum utility.

Counting - Used in the Stranger Detect Mode, this unit will quickly count/verify a stack of like bills. It stops every time a bill of a different denomination appears. You remove the "stranger" and keep counting.

Mixed Currency - JetScan will process a stack of mixed bills and provide the total value plus a breakdown by denomination.

Sort - Here, JetScan makes quick work of sorting and counting mixed money with unequalled ease and accuracy.

The Two-Pocket JetScan

For Speed and Volume

Like all JetScans, this unit can be used to count mixed currency, sort mixed currency, find "strangers" and more. With two pockets, this model allows two or more currency processing functions to be combined for maximum productivity.

For example, you can face and bundle \$1's in quantities of 100. JetScan counts green-side bills into the top hopper and black-side bills are counted into the bottom hopper. When their total reaches 100, JetScan stops and tells you.

If a \$5 is detected while you are processing these \$1's, JetScan stops exactly on this \$5 and tells you where it is located. You remove it and continue processing.

Two pockets make it fast. The illuminated touch screen makes it easy to use. And, Cummins JetScan technology makes it accurate and reliable.

Currency Counters

Operating at operator selected speeds from 600 to 1,600 bills per minute, these US made counters assure fast, accurate currency processing. A Value Count mode automatically multiplies the value of the denomination processed by the note count to provide the total value.

Coin Counters & Packagers

Coin Counters & Packagers

These units make quick work of coin counting and packaging. Designed for reliable and easy-to-use operation.

Counting - coins of the selected denomination are counted into a bag or coin tube while other coins are offsorted and collected in a second bag for subsequent processing.

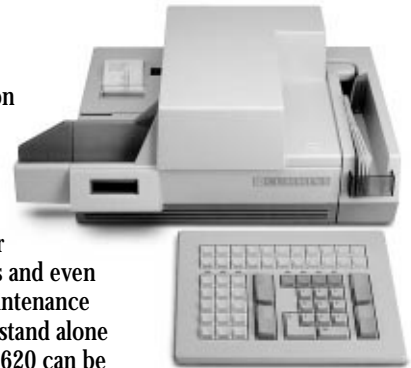

Packaging - coin packaged into paper tubes/wraps is quick, accurate and very easy thanks to a special "trigger". The unit accurately dispenses the desired number of coins with each push and tracks total number of coins dispensed.

MICR Encoders

MICR Encoders

By adding special Magnetic Ink Character Recognition (MICR) symbols and characters to checks and other financial documents, MICR Encoders allow faster processing schedules and even reduced account maintenance fees. Series 1610 is a stand alone encoder, and Series 1620 can be used for stand alone or computer interfaced applications.

JetSort high speed coin sorter/counters are available in a counter top version (Model 2000) and a floor unit (Model 4605).

JetSort® High-Speed Coin Sorter/Counters

The patented JetSort technology provides superior sorting speed, accuracy and ease of use. Processing as many as 6,000 coins per minute, JetSorts use only one moving sorter part! The Model 4605 processes mixed coins at a rate of up to 6,000 coins per minute. The Countertop model 2000 processes up to 2,400 mixed coins per minute.

The accuracy of all models is 99.995%. And, JetSort can handle the 1¢, 5¢, 10¢, 25¢, 50¢ and the Susan B. Anthony \$1 coins. The Model 4605 is a self-standing floor model that sorts all coins into coin bags. The counter top Model 2000 sorts coins into boxes (drawers) or bags.

Today's JetSorts are the result of nearly 10 years of experience, refinement and success in processing volumes of coins. These latest models include the latest operating and "accounting" features. JetSort can simultaneously retain totals for a sub-batch and cumulative batch while also tracking separate totals for each denomination in each bag/box, as well as day totals.

There are a wide variety of options and accessories for both models so you can meet each of your needs without the expense of unneeded capabilities.

And, every JetSort is designed and built in the USA by Cummins-Allison!

Perforators

Perforators

Using a Cummins Perforator is the fastest, most productive way to mark documents clearly and permanently. A single actuation marks one to 25 sheets with letters & numbers formed by small holes or perforations. These easy-to-read markings can't smudge or obliterate existing printing. And, they cannot be erased or removed.

"Perfing" is Fast, Efficient & Productive — It's the fastest way to mark multiple pages. Thousands of documents can be marked per hour. Variable dates & lines can be set in seconds. Simply insert each set of documents into the unit to instantly actuate.

Multiple pages in a set may vary in size, shape & thickness and a single actuation automatically "perfs" the same inscription through every page without skipping. No need to remove staples. And there are no ribbons or messy ink!

Typical Applications — Recommended by auditors, Perforators assure greater control, security and productivity. "Perfing" permanently marks a document's "history"-received, keyed, entered, canceled, paid, etc.

Widely used for invoice canceling, mail dating, x-ray and film marking, source document marking, process dating, document dating, validation & cancellation-plus many other valuable uses.

Some Typical Applications Include:

- Invoice Canceling
- Mail Dating
- Source Document Marking
- License Validating
- X-Ray Film Marking
- Document Canceling
- Stocks & Bonds
- Numbering
- Document Validation
- Key Entry Marking
- General Marking
- Sealed Bid Dating (Marking without Opening)

Single Variable Models

Described here is the group of Cummins Perforator models that are available with one, two, or three-line "inscriptions." The optional top and bottom lines are factory-set. The center line is operator controlled. Models are available with adjustable center lines for: Dates; Numbers; Dates/Numbers; and Letters or combinations.

Ask your Cummins Rep for details on the wide variety of types and styles of inscriptions.

SPECIAL

◀ Top line (optional) is factory-set.

123456

◀ Middle line is operator controlled. Models available for dates, for numbers and for dates & numbers.

WORDING

◀ Bottom line (optional) is factory-set.

Multiple Variable Models

The group of Cummins Perforators described on this sheet can have one, two or three-line "inscriptions." The top and bottom lines are optional. Either or both can be factory-set or variable. The center line is always variable, models are available for dating, numbering, dating/numbering, and for special uses.

These perforators are ideal for applications where they will be used for different functions, by different departments and/or by different individuals. Functions, departments, and/or individuals can be identified using variable lines.

Metal "keys" control the variable top/bottom lines of the inscriptions. These keys can be used to identify: the function, the department, the operator or whatever is needed. The versatility is unlimited. When the operator is identified in the inscription, you gain excellent control and accountability.

KEYED

◀ Top line (optional) is factory-set or variable using metal "keys".

12-31-98

◀ Middle line is operator controlled. Models available for dates, for numbers and for dates & numbers.

R. SMITH

◀ Bottom line (optional) is factory-set or variable using metal "keys".

Reduced size perforation shown.

Ask your Cummins Rep for details on the wide variety of types and styles of inscriptions.

Automatic Consecutive Numbering Models

These models of Cummins Perforators have the ability to consecutively number single or multi-page documents. These models are available with one or two-line "inscriptions". The optional top line is factory-set.

Shown are actual size examples of typical consecutive number inscriptions. In all cases the automatically advanced digits are the five digits on right side of the lower line. Other digits or letters on this same line are operator controlled.

▼ Top line (optional) is factory-set.

YOUR CO NAME
12-30-98 23456

▲ Bottom line is the last five digits which advance automatically. All other characters are operator controlled.

Reduced size perforation shown.

Ask your Cummins Rep for details on the wide variety of types and styles of inscriptions.

Cut Sheet Imprinters

Cut Sheet Imprinters for Signing, Endorsing & Imprinting

This versatile imprinter can be used to sign, endorse or imprint documents that are 2-3/4" to 14" wide and 3" to 14" long. Easy to use, and versatile so the same unit can be used to sign and endorse and imprint different forms, it processes up to 300 forms per minute (3-1/2" high forms). It can handle form weights from 18 to 125 lb. bond. A wide variety of dies are available to handle all types of applications. (Replaces Tallyprinter.)

Notes: * Requires shredder stand

** Includes Auto-Oiler/Requires shredder stand

*** Sheet Capacity: Listed USA number is the number of 20 lb. 8 1/2" x 11" copier paper sheets shredded. The Intl. (International) number is the shred capacity for foreign 70 gsm A4 paper which is significantly thinner and lighter in weight than USA paper. When comparing sheet capacities of Cummins paper shredders to other brands, always compare sheet capacities for the same type of paper.

†Specifications provided are approximate and subject to change without notice.
