Make sure
your business
stays
your business.

Sensitive documents
will **never** fall into
the wrong hands.

WE GUARANTEE IT.

PROSHRED is the leading mobile shredding service in North America, and the Corporate Head Office is the only mobile shredding service to have earned ISO 9001:2000 registration, meeting the rigorous quality standards of the International Organization for Standardization.

How can we be so confident?

OUR SHRED SYSTEM IS SECURE; EVERY STEP OF THE WAY.

That's the way it was designed, from day one.

PROSHRED invented mobile shredding in 1986 and has invested 16 years perfecting the PROSHRED Security System.

Our front-line personnel, our driver/security technicians, are highly trained professionals. They are the best in the business; we're proud of that. As a PROSHRED client, you have a committed partner in ensuring the confidentiality of your business.

Your sealed boxes, sealed console document bags or locked blue bins go directly, in total security, to our shredding truck; parked right at your door. Shredding takes place inside the secure truck under the total control of the technician.

Clients may witness the destruction of their documents, which are never out of sight until shredding is totally complete.

A PROSHRED Certificate of Destruction is produced for each and every secure shred.

PROSHRED state-of-the-art shredding trucks are capable of destroying up to 10,000 pounds of documents in a single hour. An amount that would literally chew up days using even the best available office shredder.

CALL IN THE PROS.

Integrated information security has never been more vital. Information theft can, and probably will, happen to any company, any size.

Considered along with the fact that in-house shredding comes with the very real costs of hours and equipment, and the very real potential for breaches of confidentiality; and the intangibles of potential lost-time accidents, professional outsource shredding makes total sense.

We'll prove it to you.

Our attractive, tamper proof locking disposal consoles are unobtrusive in any office environment and are provided at no charge.

Our tough lockable big blue bins do the job in warehouse or factory circumstances.

Minimum fuss: drop in documents you wish to dispose of as you would mail into a mailbox.

Maximum security for your sensitive information, prior to shredding.

We'll customize a plan for regular shredding service according to your needs.

A successful business generates a remarkable amount of paper. That's a fact.

Stored boxes of old files are a problem waiting to happen. The information they contain can easily fall into the wrong hands.

An employee is injured moving them around; with all the attendant compensation costs, temp costs and potential liability.

Then, of course, there's the valuable space old files take up. Space your business is paying for.
