

Chip Processor / Colorizer

CP 118

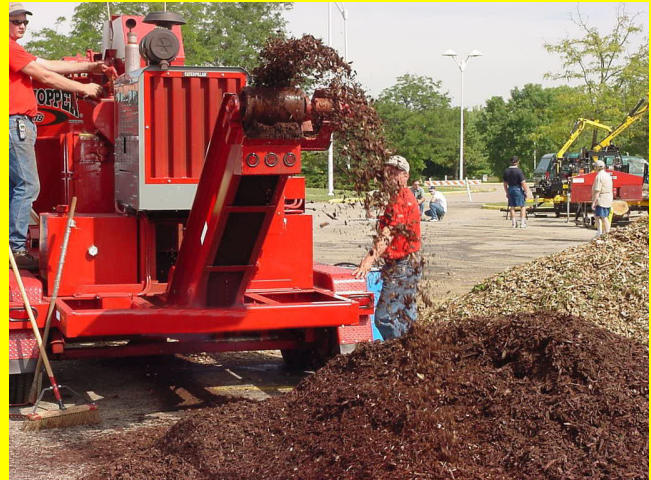

"Perfect In One Pass"

The completely mobile CP 118 can be towed by any pickup with a class IV hitch.

A 5-yard hopper, high speed grinding mill, sizing screen and patented on board Rotochopper Power Application System (PAS) permit you to turn low quality chips into premium colored mulch with infeed rates of up to 40 yards per hour.

With the flip of a switch, make any color in the rainbow and change the look, feel, and value of your wood fiber.

- Reprocess ragged, uneven chips into a uniform product.
- One-man operation to produce playground cushion, colored or natural mulch.
- Reliable CAT power and clutchless mill engagement.
- Only 11,500 lbs means go anywhere easily.
- Low 6' 2" feed height lets you easily load with a skid steer loader.

Chip Processor / Colorizer

CP 118

CP 118

Length 30' 11" Width 8' 2" Height 9' 2"

Weight approximately 11,500 lbs

Power Supply

- 86 HP - CAT 3054B engine

Feed Hopper Capacity

- 5 cubic yards
- Loading height of 6' 2" x 7' wide opening, left or right
- 16" infeed belt with hydraulic flow valve control

Grinding / Colorizer Chamber

- High speed rotor with replaceable hammers
- Patented grinding chamber colorizing system
- Interchangeable screens for precision product control

Discharge Conveyor

- 6' 2" dump height with 16" wide belt

Product Output

- Up to 35 yards per hour (depending on screen size and feedstock)

Trailer

- 2 Tor-Flex axles with oil bath hubs, electric brakes, DOT lighting, ball or pintle hitch

Your Chipper's New Friend

The CP118 is the newest addition to the line of highly successful wood fiber processors from Rotochopper. The CP118 employs the same baffled screens and patented power application system (PAS) that has made Rotochopper the leader in quality mulch processing equipment.

Keep your capital costs at a minimum, process and color your chips in one simple and affordable machine.

The CP 118 from Rotochopper can be towed by any pickup with a class IV hitch and be setup and running in minutes.
