Alan Croll and Frank Woodbridge have extensive experience in the various disciplines associated with designing and constructing cogeneration and similar energy projects. In 1991, they formed Cogeneration Consultants to dedicate their efforts exclusively to this field. They have been responsible for studies, system design, major equipment specifications, preparation of construction plans and specifications, utility interconnect agreements, design and programming of computer control systems, construction supervision, startup and checkout, and customer training for numerous cogeneration systems.

They have completed energy projects for tier one and tier two automotive suppliers, a national landfill company, and national food processing companies, major hospitals, and utilities.

Alan B. Croll, CCP

Mr. Croll has been employed in the engineering, management, sales, and ownership sectors of a Cummins engine distributor, a Waukesha engine distributor, and a mechanical contractor.

He has extended his knowledge of the power generation field beyond engineering by completing classes with Automatic Switch Company, Cummins Engine Company, Westinghouse Electric, Woodward Governor, Basler Electric, and the Association of Energy Engineers.

He is a Certified Cogeneration Professional (CCP), in accordance with the requirements of the Association of Energy Engineers.

Frank S. Woodbridge, PE

Mr. Woodbridge has been employed in the engineering, management, sales, and ownership sectors of two electrical contractors and a mechanical contractor.

He has extended his knowledge of the field beyond engineering by completing classes with General Electric, National Electrical Contractors Assoc., Andover Controls, Bell & Gossett, Woodward Governor, Basler Electric, University of Wisconsin, and University of Missouri.

He is a Registered Professional Engineer in the State of Michigan and has been registered by reciprocity in five other states.
