PCB Repairs

Electrical and Electronic Repairs

We are experienced in all types of

electrical and electronic repairs and new installations of all ship-board systems. We work with systems and equipment such as: engine alarm & control systems, cylinder combustion, pressure and monitoring, oily water separators, ballast monitoring, PCB repairs and fabrications, PLC programming and repairs, and so forth.

Calibration Servelec operates a Calibration Laboratory, where complete testing, calibration and repair of mechanical and electrical measuring equipment is available, including individual certificates of the calibration.

Testing Bench

Level Measurement via Radar

Bilge Level Alarm & Control

Panel Design & Fabrication

We at Servelec can design and build to specifications any size of panel from push button control station to the largest multi-door motor control panel.

Technician working on motor control panel.

Generator & Motor Repairs/ Rewinding

Servelec's motor / generator shop provides motor rewinding and restoration as well as generator and regulator repair and service.

Removing old Rotor

System Design & Development

Servelec takes pride in its own production and development of electronic, pneumatic and hydraulic equipment:

- » Radar cargo tank level gauges
- » Vapor recovery alarm systems
- » High Level and Overfill alarm systems
- » Cargo tank pressure alarm systems
- » Development of instrumentation and control panels and more...

(per Client's request)

Inspection

Servelec provides knowledge and experience to perform all on-board equipment inspections, check and testing of tankers and any other type of ships.

Panel Inspection

Deck & Engine Stores Servelec is your source for ship stores and supplies. We carry electrical, electronic as well as deck, cabin and engine stores. We provide parts from Japan, Europe and the United States for all types of ships. Many items are in stock. We at Servelec are experts in providing new, used, reconditioned and remanufactured items.
