## Would you rather work on your deck or live on it?

Your deck is your sanctuary. Your place of escape where work, stress and rush-hour traffic simply don't exist. Of course, your deck can only be this magical place as long as it keeps its good looks. Wood's natural decay can turn that place of retreat into a virtual "to do" list before you know it. That's where a TimberTech deck comes in. TimberTech is a revolutionary alternative to wood that doesn't rot, warp or splinter like wood. Which means you'll spend time on your deck doing the things you want to do. Not the things you have to do.

## TimberTech looks great longer.

TimberTech keeps looking great through years of use and exposure to the elements. That's because it's made through a unique process that turns polymers and recycled wood into a strong, moisture-resistant decking you'll never have to seal, stain or paint.

## More of everything you want a deck for.

Since a TimberTech deck requires less of your time for maintenance, it gives you more time for everything else. Create a romantic outdoor dinner setting. Have the neighbors over. Or just teach your kids the perfect doggie paddle. TimberTech's excellent water and slip resistance makes it safe for pools, hot tubs and rainy days. But moisture isn't the only thing your TimberTech deck can resist. Splinters and termites won't be found here either.

What's more, a TimberTech Tongue-And-Groove deck gives the fastener-free feel of indoor flooring outdoors. No nails or screws stick out of the surface, making a TimberTech deck safer and more attractive than decks made with wood or other engineered decking products. That means with TimberTech, you can turn your backyard into another spacious, safe and wonderful part of your home.

## Product Choices

## Color Selection

### Tongue-and-Groove Plank

- Exclusively patented design provides fastener free surface giving the feel of indoor flooring outdoors
- Brushed surface provides the look of wood
- Available in 12', 16' and 20' lengths

### 5/4 Plank

- Installs like traditional wood planks
- Brushed surface provides the look of wood
- Highest quality material in the industry
- Will not sag like other alternative decking
- Quality at a great value
- Available in 12', 16' and 20' lengths

### 2 x 6 Plank

- Installs like traditional wood planks
- Brushed surface provides the look of wood
- Engineered for maximum strength to weight efficiency
- Available in 12', 16' and 20' lengths

A great way to complete any TimberTech deck

### Ornamental Railing System\*

- Attractive "bread loaf" top rail styling
- Available in 6' and 8' kits
- Precut baluster kits available
- Complete with post covers and post caps
- Available in TimberTech Redwood, Grey, Cedar and Natural

\* Meets building code requirements from independent testing (see building codes in your area for specific requirements)

### Traditional Railing System\*

- Flat top rail design, spans 6'
- Textured finish allows for staining
- Available in TimberTech Natural

### Accessories and Trim

- 10" and 12" Fascia Board and End Cap for all decks
- Starter Strip for Tongue-and-Groove decks

### TimberTech Wood-Composite Deck Cleaner

Specially formulated for wood-composite decks, TimberTech Wood-Composite Deck Cleaner will maintain and enhance the appearance of TimberTech decks.

- Removes general soiling stains
- Restores beauty of wood-composite
- Helps protect against mold and mildew

Introducing Spring 2003

Compare TimberTech colors to the competition. TimberTech's exciting array of colors will...

### Provide Consistent Color

How: TimberTech utilizes precise color measurement systems to ensure tight color tolerances are maintained to minimize color variation.

Your TimberTech deck will provide a consistently beautiful colored surface with no color patches within each board, from board to board and lot to lot.

### Fade Less

How: Ultraviolet protection additives reduce the harmful fading effects of the sun.

With UV inhibitors and a brushed surface, fading will be minimized between your new and weathered TimberTech deck.

Weathering will occur. Actual results will vary by installation.

### Remain Comfortable

How: TimberTech uses highly reflective, inorganic color pigments to minimize the absorption of the sun's energy.

Even in the mid-day sun, your TimberTech deck will minimize heat build-up providing a comfortable deck surface as to comparable wood-composite colors.

Builders, Contractors and Remodelers taking part in *Builder* magazine Brand Use Study voted TimberTech #1 in Quality in the Composite Decking category.

TimberTech is proud of it's #1 ranking and unparalleled product quality.
