

# DECKHAND

## Helicopter Restraining and Traversing System

- Designed with harsh marine operations in mind
- System does not require complex integrated tracks, winches or cables
- No modification to vessel, design even utilises standard deck fixing points
- Deck and vessel structural integrity is maintained
- All helicopter types accommodated without any kind of modification
- 'Clear' deck configuration ensures system has a high survivability since no tracks or winch cables are required
- System is not vessel dedicated - easily removable and utilised across the fleet in standard modules
- Total reliability in all conditions proven over many years of service around the world
