

LED LIGHTING SOLUTIONS

Who we are -

Demand Lighting is a manufacturer direct provider of LED lighting solutions. Demand Lighting has the capability to deliver lighting products with varying electrical capacities as needed by country or region. We provide standardized LED lighting solutions with interior and exterior lighting options that will allow you to achieve a consistent fixture type across your global portfolio.

Our manufacturer direct model eliminates the markup of traditional lighting distribution channels. Our customers save not only on the energy savings of moving to LED lighting but also on the fixture cost. We literally, light up your bottom line.

What we do -

Demand Lighting produces only superior quality UL, DLS, Energy Star, CSA, ETL, ENEC, or ROHS certified LED lighting solutions. We sell project based solutions for end users and installers in the B2B and B2G markets.

Our product offering is vast with over 550 lighting options within the energy efficient interior and exterior lighting arena. We offer both retrofit and new construction applications.

Our clients choose product only delivery or a full turnkey solution to meet their specific project needs. Our full turnkey solution includes site assessment, lighting design, audit, financial analysis, quote, product delivery, installation and removal of old lighting equipment.

We light up your bottom line™

Our Products -

Demand Lighting products are engineered to cover the complete international electrical distribution system: 100 Voltage - 480 Voltage, with 50hz-60hz depending on the geographical location. We provide complete specification sheets including product details, photometric and professional lighting software.

Demand Lighting warrants the products it provides will be free from defects in material and workmanship for up to 70,000 hours following the date of delivery.

Our Customers -

Our customers range from data centers, national retail franchises, federal and state government facilities, schools, universities, distribution & warehouse facilities, grocery stores, hospitals, art galleries, medical clinics, parking lots, hotels & resorts, oil & gas rigs, commercial office buildings, metro transportation facilities and airports.

Demand Lighting is a WBENC, TX HUB, DBE/ACBE, SBE and WBE certified national manufacturer of LED lighting.

Thank you for considering Demand Lighting as a potential solution for your LED lighting needs. We look forward to hearing from you.
