- Storage Area Network Design, Configuration and Integration
- Enterprise Backup and Storage Management Solutions
- VMS Cluster Design and Implementation

Parts, Service, Repair

IGS is the world's largest independent remanufacturer and source of supply, service and depot repair of obsolete—even recently obsolete—Digital Equipment Corporation® parts, products and systems.

Servicing Fortune 500 companies and many government agencies (including the United States Postal Service and NASA) we supply mission critical parts and components.

Extensive Inventory

At IGS we maintain an extensive inventory of DEC parts and equipment. Some date from as far back as the 60's, but we also support products manufactured as recently as last year. We refurbish and service these parts adding current technology when applicable. Our multimillion dollar inventory, coupled with our worldwide sourcing expertise enables us to fulfill your requirements rapidly and cost effectively.

Quality Assurance

You can't afford anything less than ZERO DEFECTS—and neither can we. That's why we maintain the most advanced test equipment and thoroughly test every part before shipment. This is why customers like the U.S. Postal Service have trusted us for years to service and supply products for their 365 sites.

Our approach to customer satisfaction is straightforward—we provide quality products, on time, at highly competitive prices coupled with unparalleled service.

24 Hour Turnaround

We provide Advance Replacement Service within 24 hours if we have the item in stock, and with 75,000 stock items, chances are we will. That stock includes an unmatched inventory of parts and components, right down to assembly level devices.

The IGS Systems Advantage

Our technical capabilities, coupled with our highly experienced sales staff enables us to cover the spectrum of our client's needs, from obsolete parts and products - to leading edge refurbished Systems, a veritable "One Stop Shop" - the only one of it's kind in the industry.

DEC, HP, COMPAQ, SUN, IBM, CISCO, AND STORAGETEK
