

Prove-As-You-Go Learning Solutions

- Quality, Blended Content
- Scalable Learning Management
- Efficient Content Authoring, Management & Delivery

KnowledgeNet's Enterprise Learning Suite is the "Microsoft® Office" of e-Learning. It includes a complete blended content library, learning management, and learning content authoring and management -- all built together from the ground up by KnowledgeNet using 100% Web technology, with no legacy issues or acquired products. Like Office, you can choose content, LMS, LCMS, or an entire enterprise solution and rest assured that everything will work together as you expect it should. With over four million learner sessions delivered, this is a proven solution that scales from course to enterprise and includes a 99.9% uptime guarantee.

Solutions
from Course
to Enterprise

- Scalable from group to enterprise
- Available hosted or installed

Learning Content Management

- Author, manage, and deliver reusable learning objects
- Multi-author, global, enterprise custom content solution
- Custom e-learning at off-the-shelf prices

KnowledgeNet Enterprise Learning Suite

Guaranteed
Content &
System
Integration

The secret to KnowledgeNet's easy plug and play integration is our underlying technology platform, Monsoon⁵. Monsoon⁵ was architected from the beginning to make integration with modern enterprise systems a low cost, short timeframe option. That means content from companies such as SkillSoft®, Element K®, NetG®, and others easily work with our Suite. And our content connects to LMSs from Saba®, Docent®, Aspen®, Pathlore®, THINQ® and a host of others. Perhaps more importantly, we take full responsibility for the integration, acting as a general contractor to ensure that our customers get solutions that work, as promised.

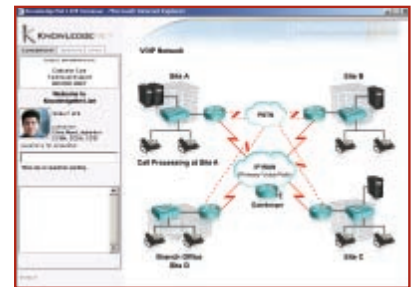

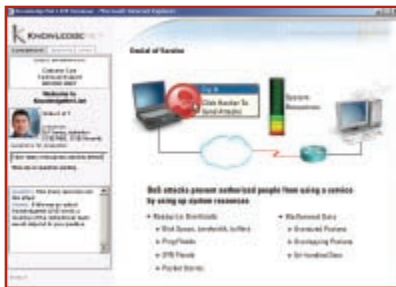

KnowledgeNet Blended Content

Because learning preferences and business requirements differ, you need a blended delivery solution, to ensure *choices* that your learners will like and use, with delivery options that are as varied as the content you need to communicate and the deadlines you need to meet. You need quality, blended content options from KnowledgeNet.

KnowledgeNet Live

Get real-time instructor-led training without leaving your office

- Live, instructor-led online training
- Engaging, interactive multimedia, crisp audio, breakthrough instructional design
- Interaction with a team of expert, certified instructors
- Hands-on labs covering real-world situations

KnowledgeNet Express

Experience flexible, self-paced instructor-led training

- Concise, instructor-led training in a convenient, self-paced format
- Engaging, interactive multimedia, crisp audio, breakthrough instructional design
- Flexible user-controlled navigation for search and reference capabilities
- Hands-on labs covering real-world situations

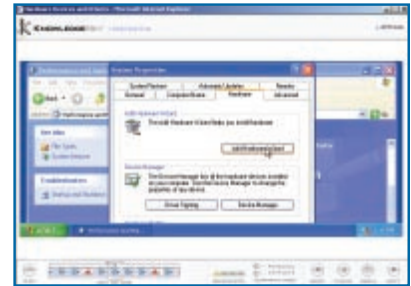

"We needed reliable and scalable technology with fast worldwide deployment. We have found everything in KnowledgeNet's Enterprise Learning Suite."

— **Bill Dacier, Vice President of Global Technical Training, EMC Corporation**

KnowledgeNet Interactive

Set your own learning pace, anytime, anywhere

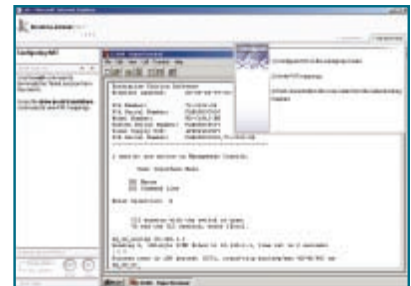

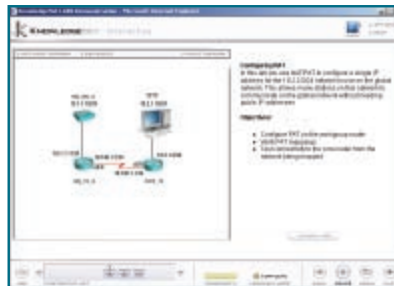

- Flexible, Web-based, self-paced learning anytime, anywhere
- Engaging, interactive multimedia, crisp audio, breakthrough instructional design
- Built-in performance tracking and personalized learning tracks
- Hands-on labs covering real-world situations

KnowledgeNet LabWare

Test your skills in a perfectly simulated environment

- Self-paced labs that automatically adjust to your skill level
- Intricate simulations, with fly-out menus and multiple paths that lead to the same solution
- Real-world, hands-on scenarios that significantly increase knowledge retention

KnowledgeNet Mentor

Get extra personal coaching, when and where you need it

- Unique one-on-one, personalized instruction and online support
- Certified instructors with real-world experience
- Chat rooms and email assistance for online student/mentor collaboration
- Extra instruction and training tools, for students who want more from their learning experience

"When we compared KnowledgeNet's e-learning content to that from other vendors, we were struck by its visual interactivity and sound instructional design, as well as the extensive use of simulations and labs."

— **Steve Nguyen, e-Learning Specialist, Cargill Incorporated**

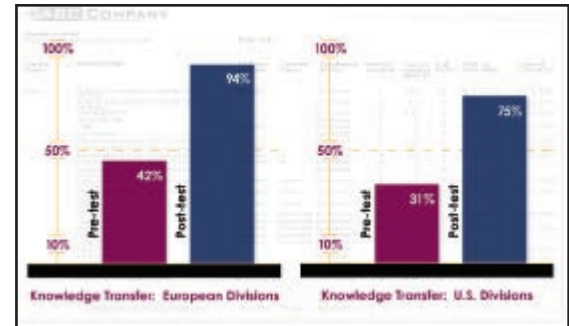

KnowledgeNet LMS

Scalable Learning Management

KnowledgeNet LMS is actually a family of three modular LMS editions that enable you to pay only for what you need and use, without sacrificing the ability to grow. Standard Edition comes free with many KnowledgeNet content libraries. Enterprise Edition is an inexpensive, yet powerful upgrade that dramatically expands group reporting capabilities. And with Channel Edition you can easily extend learning via customized portals for partners and suppliers. KnowledgeNet LMS is the first to be truly optimized for the delivery of learning object-based e-learning, and its group metrics and analysis reporting is second to none. With over four million learner sessions managed and a 99.9% uptime guarantee, it is a rock-solid investment in your people.

Manage, track, & report on learning from one central location

- Best of breed reporting capabilities
- Easy program administration
- Customizable corporate branding
- Fast, affordable implementation
- Trouble-free standards-based integration with third party content and LMS/enterprise systems
- Prove-as-you-go pricing from group to enterprise

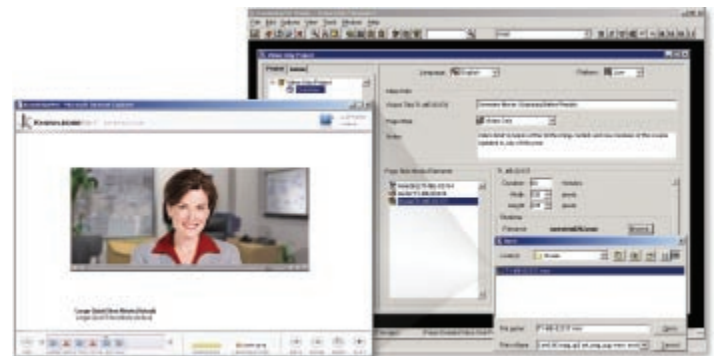

Detailed Reporting. With KnowledgeNet LMS, you can monitor multiple groups at training milestones, and compare them on a global scale, as shown in this sample chart.

KnowledgeNet LCMS

Efficient Content Authoring, Management & Delivery

KnowledgeNet LCMS delivers ultimate cost-savings through the creation, management, and delivery of reusable learning objects (RLOs). With KnowledgeNet LCMS your organization can create custom content objects rapidly and cost effectively, and deploy them automatically in self-paced, virtual classroom, and mobile formats. It is a proven, multi-author, enterprise-level system that KnowledgeNet has used to create over 1,500 award-winning synchronous and asynchronous courses in the last three years. With KnowledgeNet LCMS, companies can create custom courses at off-the-shelf-prices by modifying any KnowledgeNet course, existing internally-developed courses, or other off-the-shelf content.

With KnowledgeNet LCMS, organizations can easily and affordably customize their training content with various formats of media, including recorded digital video.

Create & deploy engaging learning for the enterprise

- Rapid development of engaging blended courseware
- Cost-saving, reusable learning object-based
- Instant global development & deployment
- Custom content at off-the-shelf prices
- Trouble-free standards-based integration with third-party content and LMS/enterprise systems
- Prove-as-you-go pricing from group to enterprise
