Presentation and TelePresence Technologies

ExhibitOne Corporation

ExhibitOne is the country's leading design and engineering firm for integrating presentation and telepresence technologies into unique, high-demand environments. Unlike audio/visual products, presentation and telepresence capabilities represent sophisticated technologies that can be adapted to specific applications and environments in order to maximize each critical component of communications — to see, hear and speak.

COMPANY OVERVIEW

ExhibitOne Headquarters in Phoenix, Arizona

ExhibitOne designs and engineers innovative presentation environments using the highest quality:

- Video display systems
- Videoconferencing systems
- Audio systems
- Digital audio/video recording
- Control systems
- Security and surveillance systems

**We give you the power to communicate with maximum impact.**

ExhibitOne is proud of its reputation for designing, engineering and integrating proven presentation and telepresence technologies into the most difficult environments.
The company has already gained the leadership position in the complex field of legal and courtroom evidence presentation and has brought this expertise into the highly sophisticated and challenging environments of:

- **Command and control centers**
- **Network operations centers**
- **Conference and meeting rooms**
- **Educational institutions**
- **Government agencies**
- **Healthcare facilities**
- **Hotels and casinos**
- **Law firms**
- **Religious institutions**
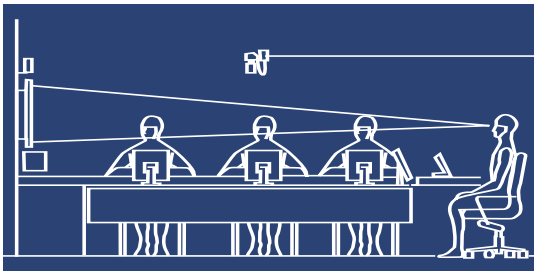

One Vision. One Source. One Team.

AS DESIGNED

THE FINAL RESULT

Ex**hibit**One®

From concept to implementation, ExhibitOne's total solution approach turns complex, technology-driven requirements into a streamlined process that creates powerful, easy to use solutions. With ExhibitOne you benefit from:

# D E S I G N & I N T E G R A T I O N

- Expertise in seamlessly integrating multiple technologies to address specific requirements of a particular room, building or campus environment

- Having one point of contact for all aspects of your project, from start to finish, including comprehensive project design review, preliminary system build and fabrication, termination of connections, mounting of equipment, calibration of components, and testing with a 33-point inspection

- CAD drawings for all items and infrastructure

- The expertise of ICIA-certified engineers (International Communications Industries Association)

- Our coordination with all parties to help lay out the placement of infrastructure, including: conduit, electrical outlets, racks and system locations

- Our ability to interface simultaneously with the architect, general contractor, subcontractors and the end user/client

- System programming by certified ExhibitOne employees, ensuring the best qualified partner for a successful and seamless implementation

- Handsome furniture for housing your essential equipment and concealing electrical components and wiring. With custom millwork enclosures, ExhibitOne solutions blend into your professional environment.

- Exceptional support that continues long after the installation, including: maintenance manuals, comprehensive customized documentation, laminated quick reference guides and instructor-lead training. Systems include a one-year warranty and local support.
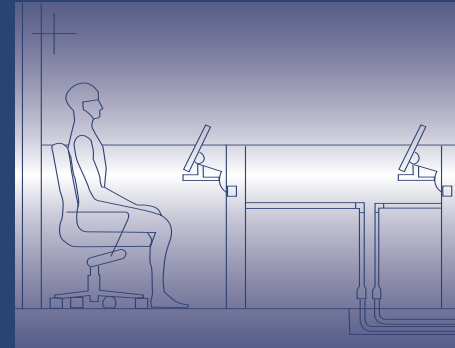

END-TO-END SOLUTIONS PROCESS

PHASE I - Needs Analysis with Client

Initial Meeting with Client	Identify and Propose the Best Solution	Meet with Client for Review and Approval

PHASE II - Design and Engineering

Project "Kick-Off"	Meeting with Client to Clairfy Goals and Expectations	Design and Engineering Begins	Meet with Client for Engineering Drawings Approval

PHASE III - Integration and Testing

System Components Acquisition	System Integration and Programming Begins	Testing and Client Acceptance

PHASE IV - Training and Support

| Perform Necessary Adjustments	Final Walk Through and Client Approval	Submit Final Documentation	Training, On-going Service and Support

So, what's in it for you?

No worries. You will have the technologies you need whenever you need them, because ExhibitOne helps you think through everything. After all, that's our job. Our friendly and expert staff takes your needs very seriously; we take pride in making sure all your presentation and telepresence technology requirements are addressed. We might even point out a few enhancements you didn't know were possible.
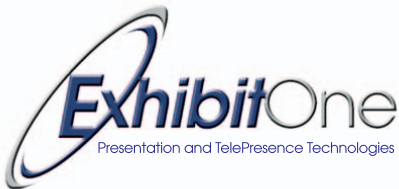

Your vision made real. Starting with your needs in mind, ExhibitOne will design a concept and engineer a solution which integrates seamlessly into your existing or evolving environment.

With more than 10 years of experience in the industry, ExhibitOne has developed and installed hundreds of presentation and telepresence solutions in the U.S. and internationally. Each ExhibitOne solution is unique to the requirements of the environment in which it is used and the needs of the people who use it. ExhibitOne has the expertise and innovation to create solutions to fit diverse client needs within numerous industries throughout the world, but all produce the exact same result — clear, high-impact communications that enable peak performance when people need to see, hear and speak.

One Vision. One Source. One Team. ExhibitOne.

ExhibitOne has been named by the Greater Phoenix Chamber of Commerce as one of the top 10 small companies in Phoenix.
