Printer Registration Procedures

When you purchase new equipment, it is very important that the product be registered with Fuji as quickly as possible to insure prompt service if required. After installation, be sure to fill out and return the *Installation Report/Warranty Registration Form*, as well as the *Parts and Service Credit Application Form* (as a government agency, Fuji does not require a signature on the application, only the top portion needs to be filled in. The credit application is required for shipment of parts and service even during warranty/extended warranty periods.

Please FAX (preferred) or mail (to the east coast office on the previous page) your *Installation Report/Warranty Registration Form*, as well as the *Parts and Service Credit Application Form* to:

Fax to: 1-732-857-3446

Not registering your printer will delay service and prevent you from purchasing an extended service contract.

Extended Service Contract

You must complete the above Printer Registration Procedures prior to the expiration of the 90 day warranty period in order to purchase a first year extended warranty contract on your printer. First year contracts purchased after the 90 day standard warranty will be subject to a billable service call to verify the eligibility for extended warranty coverage. Printers under warranty outside the continental US should contact FUJI for instructions on obtaining warranty service.

- ▶ **Manufacturers Warranty:** 90 days labor / 1 year parts from date of installation - continental US only.*
- ▶ **The first year extended warranty** is a 9 month extension of labor coverage to one year.*
- ▶ **Subsequent (2nd-3rd years, etc.) extended warranty** includes 12 months parts / 12 months labor - continental US only. This must be purchased prior to the expiration of the previous warranty period to prevent a billable service call to re-confirm eligibility for warranty coverage.*

* *Parts coverage subject to the warranty terms & conditions included with each product at time of delivery.*

To purchase an extended service contract for your printer you can either contact your authorized GSA reseller or fill out and fax the *Quality Assurance Program Form* to the Service Department at

732-857-3446 prior to the expiration of the 90 day warranty period.

For current pricing information, please contact your dealer or email rhonda_mangan@fujifilm.com, or toni_graham@fujifilm.com.

See form on
page 8.

After Sales Equipment Support

Use the following email address to contact the Service Department to:

- * Initiate a service call.
- * Check on the status of a call.
- * Request help

Ordering Instructions

For your convenience, electronic Order Forms are available in Microsoft Excel format by contacting:

GSA@fujifilm.com

GENERAL INFORMATION

The Hard Copy Order Form on the following page is designed to act as a simple and reliable quote form that can be used to price and order Fuji materials.

- ▶ Fill in the Bill To/Ship To information. You need to fill in only one if the Bill To/Ship To is the same.
- ▶ Simply input the quantity and price of each item you wish to order. If the order is to be a Credit Card order, please use the appropriate pricing and provide the necessary card information.
- ▶ Fax the Order Form to the FUJIFILM number below. The order will be expedited within 2 days.
- ▶ If you are using a credit card and have already placed an order Directly with FUJIFILM, your credit card number is on file. Once you have established a direct account with Fuji or a Fuji Direct account through your dealer, you can expedite your orders simply by emailing/faxing the order form to Fuji.
- ▶ Just submit your order via email/fax with instructions to charge your card on file. All ship to/bill to information must match the number on file in order to process a request to charge an IMPAC card on file.
- ▶ You may request a confirmation receipt via email ONLY.
- ▶ Include your email address on the form to receive future updates.
- ▶ New accounts (first orders) will take 1-2 days extra due to administrative requirements.
- ▶ Please check periodically with Fuji Government Sales Office for updates.

FinePix S2 Pro

Pro SLR Camera

The FinePix S2 Pro boasts Fujifilm's next generation Super CCD sensor system for professional photography. With 6.17 million effective pixels, this general-purpose camera is capable of producing an image file with 4,256 x 2,848 (12.1 million) pixels for pictures with stunning color and detail that are sure to please even the most discerning photographer. The FinePix S2 Pro also features a CCD Raw mode, which delivers the image before it has been processed by the camera's internal algorithmic settings, thereby liberating professionals to experiment with their photographs as they see fit.

Fujifilm's newly developed Super CCD reflects a comprehensive improvement of image quality through the CCD and a new LSI featuring an advanced image-processing algorithm. Fujifilm's Super CCD features unique octagonal-shaped photodiodes in an interwoven arrangement that realizes a larger photodiode for each pixel. The sensor shape and arrangement of the Super CCD produces well-balanced digital image quality with increased sensitivity, offering a much wider dynamic range, improving signal-to-noise (S/N) ratio and giving higher resolution, greater tonality and true-to-life colors with sparkling clarity.

The new generation Super CCD has been redesigned to control the total balance of all these factors to achieve a higher level of image quality.

FujiFilm FinePix S2 Pro Camera Product Advisory

It has been recently reported that FinePix S2 Pro cameras may be available through sources other than Fuji Photo Film U.S.A., Inc. ("gray market cameras"). It is important that we bring this issue to your attention since purchasing European specification S2 cameras in the U.S.A. will result in the following difficulties:

- Fujifilm cameras originating from sources outside of Fuji Photo Film U.S.A., Inc. are not warranted by Fuji Photo Film U.S.A., Inc. and therefore are not eligible for warranty service from Fuji Photo Film U.S.A., Inc. The origin of these cameras can easily be traced via the serial numbers.
- Gray market cameras do not come equipped with a US AC adapter; we cannot provide adapters for these cameras.
- Video output may be in the PAL video standard and therefore not compatible with the U.S.A. NTSC standard
- Since the FinePix S2 camera is subject to Part 15 of FCC regulations, it is possible that gray market cameras may not meet FCC standards and therefore, **sellers of these cameras may be subject to extensive fines.**

All Fujifilm FinePix S2 cameras marketed by Fuji Photo Film U.S.A., Inc. can be easily identified by the following distinctive packaging:

- Notation of "NTSC" to the right of the UPC code (S2 Cameras coming from Europe will have a "PAL" notation instead.)
- Sticker on top of the box indicating "BONUS - Free AC Power Adapter Included".
- Don't be disappointed with a FinePix S2 camera that will not perform up to our exacting standards.
- Be sure to purchase a "Made for U.S.A." FinePix S2 Pro camera from your authorized dealer.

LUMA & LUMA II

Digital Camera Back

The new LUMA and LUMA II Digital Camera Backs are designed for easy integration with the Fujifilm GX680III and other medium format cameras, providing a bridge between traditional and digital imaging capabilities. Fully compatible with standard studio lighting including electronic strobe, tungsten, HMI and daylight, the new Backs also feature an ISO of 25 programmable up to ISO 200. *Works with Macintosh computers only.*

The new LUMA and LUMA II Digital Camera Backs are driven by a standard FireWire® communications cable and are "hot pluggable" for connectivity to any FireWire-capable desktop or portable Apple® computer over virtually limitless distances. Plus, the live video option enables photographers to view up to 5 frames-per-second with multiple auxiliary monitors or computer monitor display, making it incredibly easy to quickly compose an image and focus interactively.

The LUMA II Back, manufactured to Fujifilm specifications by Mosaic Imaging, features the new Phillips CCD that offers a rectangular format (3.6cm x 2.4cm), preferred by professional photographers for its greater usable area. With the option of International Color Consortium (ICC) workflow standards, the LUMA II Back faithfully records and preserves scene color, which is captured by the sensor, specified with 12 f-stops of dynamic range, one of the highest within the industry.

CODE	DESCRIPTION	GSA PRICE
43026001	LUMA Digital Camera Back Kit Offering a full-format 3.6cm x 2.4cm CCD array with 2,048 x 3,072 pixel resolution and 12 f-stops of dynamic range using 14 bits of data per color channel, the LUMA Back with One-Shot Instant Color Capture produces exceptionally clear, superior-quality images at the rate of one image every 1.5 seconds.	\$ 13,194.50
43026002	LUMA II Digital Camera Back Kit With the new CCD chip, the LUMA II Back has an increased resolution with 4,008 x 2,672 pixels to offer users larger print sizes, more cropping flexibility and fewer color artifacts.	17,594.50
For a limited time only, with the purchase of the LUMA, one of the kits below is included at no charge. Please specify desired kit.

Pictrography 3500

Digital Photographic Printer

An innovative, unique digital color printer incorporating Fujifilm's proprietary Laser Exposure-Thermal Development-Dye Transfer Process. The PG3500 is a high productivity printer that takes only 2 minutes for the first print and each subsequent print of the same image in about 70 seconds. Consistent, accurate results from start to finish thanks to the Color Calibration System. An environmentally friendly printer that produces brilliant, photo-quality continuous tone PICTROprints from a wide range of digital image data. Print directly from computer graphics, scanned images and photo CD's, without chemicals or toners. Files can be printed on half-sheet to save paper. And with 3 resolutions to select from (267 dpi to 400 dpi), extremely fine detail can be rendered on Glossy, Matter or Over-Head Transparency materials. Latest enhancements are the improved built-in Color Calibration System, increased productivity due to SCSI II connection and included Printer Driver allows printing from any application.

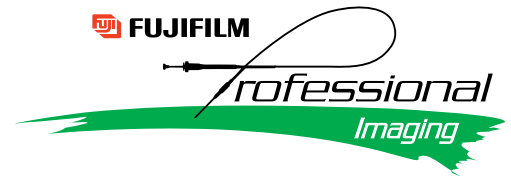

CODE	DESCRIPTION	GSA PRICE
43511035	Pictrography 3500 Digital Color Printer Ships with the following items in the crate; Manual, Power Cord, Water Conditioning Cartridge, SCSI II Interface, a 48 MB Frame Buffer for 8.5x11 printing as well as CD Rom containing Fujifilm PICTROdriver software along with Adobe Photoshop Plug-in for both MAC and PC systems. Color Calibration System is built in to the top of the printer and no longer ships as a separate package along with the contents. Pictrography has 3 selectable resolutions; 267, 320, and 400 DPI. The maximum image area is 8.58" x 11.78". For GSA customers only the PG3500 ships with a Media Starter Kit consisting of #43701100: PG3500 Donor and #43701200: PG3500 Receiver. Note this is a promotional kit subject to change without notification and has no cash value.	\$ 3,107.22
43512034	PG3500/4000II Installation Kit Kit applicable for both PG3500 and PG4000II printers. Includes CD Rom containing video clips on the procedures for uncrating the printer, environment surroundings, as well as instructions for start-up. Includes Technical Guidelines & Warranty Information, Product Registration Form, Fujifilm FIN# registration number and procedures, Credit Application and Contact Phone Numbers. MUST BE ORDERED WITH PRINTER.	N/C

New Pictro-Paper ER

PICTROPRINT
EVER-RICH

New Pictro-Paper ER combines the latest image transfer technology with a level of quality unmatched by other papers. Pictro-Paper ER is engineered to deliver a consistent level of quality, print after print.

The New Pictro-Paper ER offers all the advantages of traditional photographs, including pure color reproduction, repeatable, predictable results, wide color gamut, fine detail, deep rich color saturation, outstanding image stability and a chemical free environment.

The New Pictro-Paper ER boasts the same resistance to fading during light storage as conventional color papers, due to the incorporation of newly developed color dyes, featuring superb stability and a new anti-fading agent within the diffusion transfer material. Great for all imaging applications where the look and feel of quality photographic paper is required.

Pictography 4500

Digital Photographic Printer

The Pictography 4500 replaces the Pictography 4000II, and, like its predecessor, features Fujifilm's exclusive "Laser Exposure – Thermal Development – Dye – Transfer Process," producing continuous gradation equal to that of a silver halide photographic print. To support a wide range of printing applications, the Pictography 4500 provides handling for multiple paper sizes, from post card size to photographic-standard 8x10, 10x12, and 12x18; it also handles standard paper sizes including A4, letter, A3, double letter and wide sizes. The Pictography 4500 incorporates a set of sophisticated digital imaging software technologies called "Image Intelligence™". This software will create the best possible result from the image quality, adjusting color and sharpness based on Fujifilm's long experience in the image-processing field.

CODE	DESCRIPTION	ANTICIPATED GSA PRICE
43521016	<p>PICTOGRAPHY 4500 DIGITAL PRINTER</p> <p>Ships with the following items in the crate; Manual, Power Cord, Water Conditioning Cartridge, SCSI II Interface, a 120 MB Frame Buffer, Donor & Receiver Cassette, built-in Auto-Calibrator as well as CD ROM containing Fujifilm PICTROdriver software along with Adobe Photoshop Plug-in for both MAC and PC systems. NOTE: Please order additional Donor & Receiver Cassettes to house other paper sizes and glossy or matte finish media.</p> <p>For GSA customers only the PG4500 ships with a Media Starter Kit consisting of #43711202: Donor and #43711102: Receiver. Note this is a promotional kit subject to change without notification and has no cash value.</p> <p>The following are borderless, edge-to-edge: 4"x6", 4"x7", 4"x10", 5"x7", 5.8"x7", 5"x14", 8"x10", 10"x12", 8.5"x11", 11"x17". The following sizes have borders: 12.4"x10", 12.4"x18", 12.4"x18.3". Pictography 4500 is the only digital printer to offer a 5" x 7" print that bleeds to the edge. Pictography 4500 requires a minimum of 1 each of the Donor & Receiver Magazines listed below. Pictography 4500 will print a 100MB file @400 DPI in 93 seconds! Multiple copies of the same file print in 58 seconds. Pictography 4500 has 2selectable resolutions; 267, and 400 DPI. The maximum image area is 12.4" x 18.3" @400 DPI.</p>	\$ 6,539.50
43522001	<p>PICTOGRAPHY 4000/4000II/4500 Reusable Donor Cassettes</p> <p>Pictography 4500 employs a reusable plastic magazine system because of multiple paper sizes. Pictography will not operate without this cassette. The magazine ships with spacers to fit all five Donor sizes. Set the spacers, and load the roll of Donor. Close the cassette and pull the dark slide. It is recommended that you purchase one for each size of Donor material being used to prevent waste.</p>	80.15

Print Suite Software
Pictography Printers

New software for Pictography & Printpix printers.

Whether you're an experienced Pictography user or just beginning to explore the world of photo-quality digital printing, Fujifilm's Print Suite software will let you do more than you ever imagined. Print Suite is a powerful addition to your Pictography and Printpix printers. It brings new speed, flexibility and versatility to preparing and managing all your print jobs. From creating print packages, to working on page layouts or simply ganging images to conserve paper, Print Suite will allow you to have more control, be more productive - and enjoy greater creative freedom.

Now you can:

- * Have WYSIWYG control over every RIP feature
- * Give each image on the page its own private attribute set
- * See the True colors for every image you print, every time
- * Combine different image file formats and data types
- * Package Printing w/multiple images on a single page
- * Ideal for proofing Postscript and PDF files
- * Integrated WYSIWYG Image Preview for every job: What-you-see-is-what-you-print.
- * Compatible with both Windows and Macintosh platforms.

Printpix Printer software availability to be announced.

CODE	DESCRIPTION	GSA PRICE
43512041	<p>Fujifilm Print Suite</p> <p>Fujifilm's Print Suite software is a fully featured printer driver, employing an easy-to-use graphical interface. Features include: the use of ICC/ICM color tables for screen-to-print and print-to-print matching, advanced queue management, network printing, auto-layout, tone/gradation control, selective color adjustment, step/repeat, and multi-page PostScript/PDF support.</p> <p>Print Suite software provides an easy-to-use interface in the Layout Area. Images within the Layout Area can be directly manipulated by clicking and dragging their icons directly into the window. Print Suite will automatically lay them out. Features include: zoom in/out, moving an image, resizing, rotating, stepping-and-repeating, etc. Double-click on an image within the Layout Area to cause the High Res Preview to appear. Once in this mode cropping the image within Print Suite is easy. If single image printing is desired, the AutoPrint function provides the basic steps of printing: Choose a printer and page size, choose a folder to monitor for new images, start AutoPrint.</p>	\$ 984.40

Printpix Printers

Printers and Media

Fujifilm's state-of-the-art Printpix printers produce high-quality prints using patented Printpix paper. The single-sheet process requires no inks, toners, ribbons or chemicals. The final result is a low-waste, low-cost print with rich tonal range, sharp contrast and vivid color, together with improved paper whiteness, brightness and glossiness.

The high-speed SCSI-II interface is easy to connect and the 3-D LUTs provide natural and vibrant color reproduction. Just pick the setting that matches your paper to compensate for any color discrepancies between different kinds of stock.

Ideal for photo shops, service bureaus and business offices.

Picture Centers

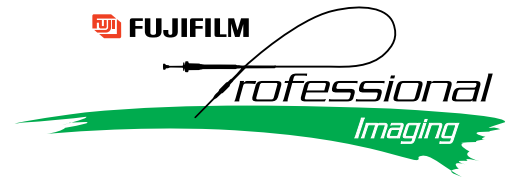

System & Controllers

The Printpix DigiCam Picture Center is a family of self-service imaging kiosks. Simple to operate and able to accept print orders from various forms of digital media, the Printpix DigiCam Picture Centers are designed for retailers looking for a low cost, space-saving entry into the profitable world of digital camera developing.

The Printpix DigiCam Picture Center is comprised of two components - an Image Controller and a separate Printpix Digital Color printer. Serving as a stand-alone customer interface, consumers simply walk up to the controller unit, insert their SmartMedia™, CompactFlash™, Memory Stick® or Secure Digital (SD) Card, view the desired image or images on a liquid crystal display and print.

Aladdin
Digital Photo Center

Fujifilm's newest self-service imaging kiosk is designed in two space saving configurations - countertop and floor standing slimline - so now even retailers with the most stringent space requirements can take advantage of Aladdin's flexibility, connectivity and variety of input/output options to reap more profits.

The Aladdin can be used as a standalone self-service device or connected directly to our award winning Pictography printers, Thermo-Autochrome printers, the Frontier Digital Minilabs or the internet, providing a full e-Solution.

Instant Film

Fuji Instant Color Film FP-100C is a "peel-apart-type" instant color day-light film with an ISO speed rating of 100. FP-100C color emulsion represents the primary type of instant product used within the professional and ID market places. FP-100C can be used in cameras and other photographic equipment that accept instant film with an image size of 3.25 x 4.25 in., and those provided or fitted with an instant camera back. The FP-100C instant film series has been optimized for shooting under sunlight or electronic flash.

The Fuji instant black and white film series FP-100B and FP-3000B is a "peel-apart-type" panchromatic material designed for camera back incorporated photographic equipment and cameras that accept instant film packs yielding 3x4 images. Two different emulsion types available FP-100C ISO100 and FP-3000B ISO 3200 high speed.

Frontier Minilab System & Accessories

Frontier 330/340 **NEW**Page 44
Frontier 350/370/390 SystemsPage 45-46

Refer to the Fujicolor Paper section for Frontier compatible products.

Frontier 330/340

Compact Minilab

Predecessor to the Frontier 330, the new Frontier 340 boasts an impressive processing capacity of 900 prints per hour for 3R size prints, and 800 prints per hour for 4R size, while still maintaining the compact 13 square feet footprint of the Frontier 330.

Using a groundbreaking technology including a newly developed processing mechanism and chemical system (CP-49E), the new Frontier 340 possesses an incredibly fast processing speed that has helped cut processing time from three minutes and 40 seconds (dry-to-dry) to only one minute and 40 seconds. Fujifilm is able to make such advances by leveraging its industry expertise and leadership across multiple manufacturing sectors, including chemical, paper and equipment. These improvements will allow retailers to greatly expand workflow while maximizing valued workspace.

The Frontier 340 incorporates a set of sophisticated digital imaging software technologies called Image Intelligence, Fujifilm's proprietary technological breakthrough in image processing that results in colorful, true-to-life prints. The Frontier 340 creates the best possible image quality by adjusting color and sharpness based on nearly 70 years of experience in image processing.

Supplemental Authorized
Federal Supply Schedule Price List
FSC Group 75, Part II, Section A
FSC Class 7045

Contract Number: GS-14F-1200H

Period-April 1, 1998 through March 31, 2003
Contractor's Business Size - Large

Contractor/Address:

Fuji Photo Film U.S.A., Inc.
ATTN: J. Thomas Baum (MMD)
555 Taxter Road
Elmsford, NY 10523
Toll-Free Number: 800-755-3854 Ext. 1703
Telephone: 914-789-8100
Fax Number (for inquiries): 914-789-8490
Fax Number (for orders): 630-259-7889

Special Item Numbers, Maximum Order:

<u>SIN</u>	<u>Maximum Order</u>
75 200:	\$150,000

Fuji is not obligated to honor orders exceeding the above amount. Fuji must, within five workdays after receiving any order it does not intend to honor, re-turn that order to the issuer.

Minimum Order: \$100.00

Geographic Coverage: The fifty states, the District of Columbia and Puerto Rico.

Point of Production: All items are made in the United States or in Japan. (Japan is a designated country. Buy American Act penalties do not apply.)

Discounts: Prices shown herein are net. The Government discount has been deducted.

Contract Information

Special Item Numbers, Maximum Order *(continued)*

Time of Delivery: Within 30 days after orders are received by Fuji.

Expedited Delivery. When expedited delivery is requested, Fuji and its dealers will provide delivery within 20 days, if the ordered items are in stock. If overnight or second-day delivery is involved, the ordering agency will be responsible for the carrier's overnight or second-day delivery charges.

Payment Terms: Net 30 days.

Credit Card: Accepted.

F.O.B. Point: Destination.

Order Address: For orders sent by mail:

Fuji Photo Film U.S.A., Inc.

ATTN: J. Thomas Baum (MMD)

555 Taxter Road

Elmsford, NY 10523

OR

Fuji Photo Film U.S.A., Inc.

c/o your authorized Fuji Professional Video and Audio Cassette dealer

The fax number for ORDERS is 630-259-7889.

Payment Address: Invoices may be issued by Fuji Photo Film U.S.A., Inc., or by a Fuji dealer who is specifically authorized to invoice transactions under this contract. Only those dealers listed herein as being so authorized may issue invoices and receive payment for sales made under this contract.

Limited Warranty: The Fuji Lifetime Warranty granted to commercial customers covers each of the products listed herein.

Approved on June 7, 2002, this modification provides for permanent Government price reductions on D321 Digital Be-tacam, M321 SP Betacam, HD331 HDCAM, most DP121 DVCPRO, and most PG Videocassettes, effective May 30, 2002. The Product Code for each item with a reduced price is marked with an asterisk ().*

Fuji Film's Magnetic Markets Division provides the Professional Video and Audio Cassettes shown in this Supplemental Authorized Federal Supply Schedule Price List. In addition, Fuji Film offers Computer Data Cartridges, Floppy Diskettes, CD-R Disks and Magneto Optical Disks. For a copy of the Federal Supply Schedule Price List for those items, please contact Fuji Film's Computer Products Division on 800 755-3854.

*** The Government price for the items marked with an asterisk (*) on the following pages reflects a reduction that was effective May 30, 2002.**

<u>SIN</u>	<u>Maximum Order</u>
75 200:	Digital Data Storage Media \$150,000

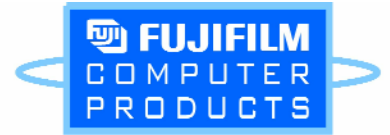

Fuji is not obligated to honor orders exceeding the above amount. Fuji must, within five workdays after receiving any order it does not intend to honor, re-turn that order to the issuer.

Minimum Order: \$100.00

Geographic Coverage: The fifty states, the District of Columbia and Puerto Rico.

Point of Production: Floppy Disks, Germany; Zip Disk-100/200, Belgium; Zip Disk-750 (all brands), Malaysia; CD-RW, DVD-RW, DVD+RW, and USB Drive, Taiwan; DLT and LTO Plastic Cases, USA. All other items are made in Japan.

Discounts: Prices shown herein are Government net.

Special Item Numbers, Maximum Order *(continued)*

Time of Delivery: Within 30 days after orders are received by Fuji.

Expedited Delivery. When expedited delivery is requested, Fuji and its dealers will provide delivery within 20 days, if the ordered items are in stock. If overnight or second-day delivery is involved, the ordering agency will be responsible for the carrier's overnight or second-day delivery charges.

Payment Terms: Net 30 days.

Credit Card: Accepted.

F.O.B. Point: Destination.

Order Address: For orders sent by mail:

Fuji Photo Film U.S.A., Inc.
c/o a participating Fuji Computer Products Division dealer

Orders sent by fax must go to participating dealers.

For the name, address, phone and fax number of your local CPD dealer, call 800-755-3854, or go to <http://www.gsaadvantage.gov>. (Search for contract GS-14F-1200H and, anywhere within the resulting list, click on FUJI PHOTO FILM USA INC to see the list of order/payment addresses. You may place your order, offline or through GSA Advantage, with Fuji Photo Film U.S.A., Inc., in care of any dealer designated "Computer Me-dia Dealer".)

Payment Address: The participating Fuji Computer Products Division dealer with whom you place your order will fill that order, issue the invoice and re-ceive your payment. Only those listed by Fuji as participating dealers may issue invoices and receive payment for sales made under this con-tract.

Limited Warranty: The Fuji Lifetime Warranty granted to commercial customers covers each product listed herein. The warranty period is ten years for DLT cartridges, and the normal useful life for all other products.
