Company Profile

Since the late 1930's, Asplundh has been helping its customers recover from devastating storm conditions. From over 70 years of experience, we have developed emergency procedures for our personnel and customers that assure a quick and satisfactory response to the crisis.

Quality Personnel

If debris is blocking your infrastructure, or if trees are down or dangerously damaged by wind, ice, snow, rain or fire, it's reassuring to know that Asplundh's crews are well trained to work in these hazardous situations.

Our highly trained crews work around hazardous conditions such as energized wires every day, making safety a top priority for all Asplundh people, at all times. To get

the job done properly, Asplundh crews are provided with well-designed equipment, tools, safety gear and a comprehensive safety program.

Whatever it takes to clear the debris, Asplundh crews and their supervisors are ready to serve you at any hour of the day or night. We are dedicated to getting you back to your normal operations as quickly and efficiently as possible.

Mission Statement

At Asplundh Environmental Services our mission is to be the leader in providing professional, safe and cost-effective debris management and other environmental recovery services. With this goal in mind, each person on our team is challenged to consistently exceed the expectations of the customers for whom we work, and the people they serve.

Management Profile

Colonel (Retired) W. Sid Vogel, U.S. Army – President

Over 25 years of successful leadership and management of large complex construction organizations in the United States, Europe, the Middle East and Latin America. Completed military career as a Colonel in the U.S. Army Corps of Engineers. Experienced at lobbying Congressional, State and Local officials. Experienced negotiator with business, labor, and local governments. Experienced public speaker and managing a public relations program and campaign. Experienced in alternate dispute resolutions, partnering, TQM, word-processing, database and spreadsheet management.

Thomas F. Rankin – Executive Vice President

Over 15 years of experience managing a wide variety of disaster events. Former state official in the North Carolina Response office. Experienced in EPA and OSHA planning. National Fire Academy Adjunct Instructor – Hazardous Materials/Hazardous Waste Curriculum. Relevant disaster work includes City of Key West, FL, Hurricane Georges; Town of North Topsail Beach, NC, Hurricane Bonnie -Sept 1998; Super Typhoon Paka - Territory of Guam, USA; Metro Atlanta Tornadoes - April 1998; Orlando Area Tornadoes - March 1998; Hurricane Fran – September 1996; Hurricane Bertha – July 1996

Commander (Retired) Thomas P. O'Donnell, U.S. Navy – Contract Administration

Over 25 years experience in Logistics and Contract Administration. Served 20 years as a U.S. Navy Supply Corps officer. Previous warranted as a government procurement official. Relevant disaster work includes Hurricane Lili – State of Louisiana Department of Transportation and Development (Oct 2002) and State of North Carolina Ice Storm (December 2002)

Luther B. (Buddy) Perry- Senior Project Manager

Retired from the US Army Mobile District Corps of Engineers. Well qualified to perform in any construction related assignment. Mr. Perry has a wide range of experience including the planning and construction Project Management of a military headquarters for a warfighting Commander-in-Chief and construction of a \$425 million private sector steel mill. Specific disaster recovery experience includes assignments as the Corps of Engineers Resident Engineer for the Hurricane Frederic Cleanup for the City of Mobile (1979-80), Segment Manager for Hurricane Camille Cleanup. Project Manager for the 2000 DeKalb County, GA, Ice Storm (\$10 million) and City of Lexington, KY Ice Storm (Mar 2003)

Using the GSA Schedule

Using the GSA Federal Schedule can significantly reduce the amount of time and money typically needed by a federal agency to obtain services from Asplundh Environmental Services, Inc.

- Competitive requirements have already been met
- Rates have been predetermined as fair and reasonable
- Applicable contracting laws and regulations have been applied

For acquiring our services you need to:

- Identify your objectives
- Prepare a statement of work for your project
- Arrange for your contracting officer to place the order directly with Asplundh following the instructions found at www.fss.gsa.gov/BPA
- If your agency requires competitive bids, have your contracting officer request a quotation from Asplundh and two other qualified contractors

Scope of Services (SIN 899-99 – Disaster Recovery Services)

The work and documentation to be performed will consist of furnishing all labor, materials, and equipment to accomplish the following types of tasks in the event of a scale disaster that results in an emergency declaration:

- Permitting, clearing, and/or removing disaster related debris from the public right-of-way, streets, roads, canals, lakes and ponds;
- Selection of most cost effective, permissible debris reduction method(s);
- As directed, demolition and removal of condemned structures, buildings and other debris that poses a threat to public health or safety that are related to and resulting from the disaster event;
- Tree trimming, tree topping, tree removal, stump grinding, grubbing, clearing, hauling and disposal;
- Removal of sand from roads, streets, rights-of-way; screening sand and returning clean sand to beaches or other designated sites;
- Recovery and destruction of dead fish, animals and livestock;
- Deployable Personnel – Labors, Estimators, Engineering Technicians, Safety Technicians, Environmental, Administrative and Clerical Personnel, Accountants, Heavy Equipment Operators, Truck Drivers, Mechanics
- Large project oversight for contractor compliance with Project Worksheet Statements of Work and line item identifications from contract award to final inspection;
- Provide Project Management assistance to designated GOVERNMENT staff in conducting Damage Assessments, in estimating quantity of debris, and completion of damage survey reports;
- Provide Project Management assistance to the GOVERNMENT lead engineer and contract section in development of contracts for debris removal where AES is not the provider of this service;
- Provide Project Management assistance through the development of specifications, cost estimates, performance period for work, and selection of payment methods;
- Provide Project Management assistance through assisting in conducting Kick-off meetings to ensure understanding of program policies and requirements;
- Provide Project Management assistance by providing coordination as needed with the local government, state agencies, Federal agencies, contractors and landowners;
- Identify required/needed changes to the scope contained in individual Project Worksheets and assist the GOVERNMENT in negotiating changes with appropriate agencies;
- Project scheduling and status/progress reporting;
- Review all contractor documentation for consistency, compliance and completeness and require corrections as appropriate before submitting for payment;

Authorized Users of This Schedule

- **Executive agencies; other Federal agencies**
- **Mixed-ownership Government corporations**
- **The government of the District of Columbia**
- **Government contractors authorized in writing by a Federal agency pursuant to 48 CFR 51.1**
- **Other activities and organizations authorized by statute or regulation to use GSA as a source of supply.**
