WHY DEAL WITH GMB?
BECAUSE:

- GMB has 17 years experience in designing, developing, installing and supporting heavy-duty, enterprise-wide information management solutions.

- GMB has the products, (Proven Application Modules such as GEM or RecQuery-TC), which can significantly reduce your development time and cost and lead to a much earlier rollout of benefits.

- GMB has the services you need to deliver and support your solution.

QUALITY ASSURANCE

Some years ago GMB invested in ISO9001 certification. We continue this practice and are externally audited twice per year in order to maintain our certification. GMB is certified for the design, development, distribution and support of all GMB products.

WE HAVE THE FUTURE COVERED

GMB has been producing information management products since the first DocFind in 1984. Today we are an industry leading software innovator and have set the standards for many years in information management, records management, image management, electronic document management and knowledge management solutions with thousands of clients around the world.

However, despite GMB's plethora of products, GMB is a solution oriented company, not a product oriented company. Our goal is to define a need and then satisfy that need using a combination of our existing products, consultancy services, new products, training, support and system integration services. We mould the solution to your unique needs, we don't ask you to drastically change your organization (at great expense and disruption) to accommodate our products.

gmb

GMB SERVICES

SOFTWARE UPGRADE

GMB's innovative upgrade plans let you contract ahead for one (Emerald) or three (Ruby) years, locking in future releases at heavily discounted rates based on today's prices.

SUPPORT

We offer both application and specialized technical support either at GMB or at your site.

MAINTENANCE

GMB's Incident system offers the customer twenty-four hour telephone, fax and e-mail support.

TRAINING

GMB offers standard application and technical training courses to be run either at your site or at one of our training centers. We also offer customized training courses.

CONSULTANCY

GMB has highly trained application and technical consultants who can work with you to help ensure the success of your operation.

CONVERSIONS

We specialize in capturing and converting your data.

CROSS INDUSTRY PRODUCTS

GMB's products are installed in organizations in virtually every industry segment.

TECHNOLOGY

• We use the latest but proven technologies such as VB6, C++, Java, HTML, JavaScript, etc.

• All products are full 32 bit.

• Microsoft, Novell, Oracle, Apple and Lotus compliant.

• Thin client products (i.e., Web enabled) support the Explorer and Netscape browsers running under 32 bit operating systems such as Win98 and MAC OS 8.6.

• Applications work with the world's leading relational databases; SQL Server and Oracle. They also run under the Novell, NT and Unix server operating systems.

DEVELOPMENT PARTNERSHIPS

Microsoft, Oracle, Novell, Apple, IBM/Lotus.

INTEGRATION

There isn't any product or system we can't integrate to.

Information Management Products

RECFIND-PROFESSIONAL

The complete corporate records management system.

• Manage all files, loose paper and boxes.

• Apply a Keyword Thesaurus and Retention Schedule.

• Manage and track all kinds of physical records using barcode readers.

• Free text search engine, find any file, document or box instantly.

• Security system to determine who can see what.

• Workflow processes to manage all work associated with corporate-records.

RECFIND-CORPORATE

All of the functionality of RecFind-Professional plus:

• Electronic document management.

• Version control.

• Check-in/check-out.

• Imaging.

• Archive electronic documents to CD ROM.

• Link to GMB's High-Speed Scanning module.

• Search the full text of attached electronic documents with the fully integrated ISYS search engine.

• File Filter to automatically capture all new and modified electronic documents.

• Use RecFind's e-mail enabled functions to automatically advise staff of changes and work to be completed.

• Enhanced network security.

KNOWLEDGEONE (K1)

The ultimate knowledge management system encompassing Content Management, Client Relationship Management, Electronic Document Management, Human Resources Management, Records Management, Asset Management, Tacit Knowledge Management, E-mail Management and much more. Provide enterprise-wide access to all corporate information, whatever the source and location, from each desktop.

Totally thin-client and based on the Microsoft DCOM model. Due 1st Qtr 2002.

GEM

Managing and controlling corporate e-mail has become the problem for most large organizations. GMB's E-mail Manager is the solution. GEM allows you to control and filter all e-mail sent and received. GEM interfaces seamlessly with Exchange, LOTUS and GroupWise.

GEM-EDOC

The world's most revolutionary, easiest to use, least invasive, most secure electronic document management system. GEM-EDOC is fully rules driven and works behind the scenes to capture, classify, version and store all forms of electronic documents FULLY AUTOMATICALLY.

RECQUERY-TC

The thin client (Browser resident) version of RecQuery. It runs on a Web server, links to the RecFind database via ODBC and to the user via Microsoft Explorer or Netscape.

Access your RecFind-Corporate database from anywhere in the world.

RECQUERY

The low cost way to RecFind-enable desktops.

• Search for, display and print information from the RecFind database.

THE RECFIND BUTTON

The industry's easiest, fastest and most non-invasive way to capture electronic documents at the desktop.

DOCFIND

The perfect home office or small business electronic record keeping system.
