27. DESCRIPTION OF PRODUCTS, SERVICES, AND PRICING
a. Products

With the Basic Evidence Presentation System, documents, pictures, videos, 3-D objects, x-rays, computer animations and computer-based presentations can be viewed on high-resolution monitors strategically located throughout a conference room, courtroom, auditorium, or other presentation facility. The easy-to-use system provides the presiding official with complete control of the presentation process while giving speakers the flexibility to present their information in the most dynamic and compelling manner possible.

The Basic Evidence Presentation System is a tightly integrated system of presentation equipment, monitors and computer technology which dramatically reduces the time-consuming process of presenting physical information material during a presentation and improves the overall ability of the audience to comprehend what they are seeing and hearing. The system is completely state-of-the-art but very easy to manage and operate.

Optional system components allow for system expansion and custom enhancements such as:

- XGA LCD projector 1500 or 3500 lumens
- Self-tensioned portable 80" screen
- 42" gas plasma monitor
- Custom millwork lecterns and projector carts
- Wireless control system
- Video printer for annotation capture
