

Lista Workspace Solutions

Government Solutions

From military bases to aerospace installations to security training facilities, Lista workspace systems are a key component in keeping federal government organizations operating at maximum efficiency. With our wide range of workspace solutions, and our modular building block approach, Lista can completely and specifically address the unique needs of your applications with our comprehensive selection of products.

Lista: Making Federal Government Facilities More Productive

The unique Lista drawer is the all-important centerpiece of every cabinet and workspace system. It can be subdivided to create custom compartments for the ideal organization of tools, parts and other items of varying size.

Lista workspace solutions are ideally suited to address the problems specific to government organizations. To help you accomplish your goals, Lista solutions:

- ▶ ***enhance productivity and readiness***
- ▶ ***are ergonomically designed to reduce stress and strain***
- ▶ ***maximize available space***
- ▶ ***are rugged and durable for decades of use***
- ▶ ***provide more clean, organized and secure storage***
- ▶ ***can be custom-configured to meet unique needs***
- ▶ ***improve inventory management***
- ▶ ***protect expensive equipment, instruments, tools and parts***
- ▶ ***can complement the aesthetic characteristics of your facility***

In military applications, secure, organized and efficient storage is of the utmost importance. That's why so many military organizations turn to Lista's squadron of modular drawer storage cabinets. Ideally suited for a wide range of storage needs, our cabinets can be custom configured and feature subdividable drawer interiors for the complete organization of tools, components and even weapons.

Security Forces Squadron Enlists Lista Cabinets for Secure Storage

“ The 310 Security Forces Squadron based at Schriever needs to be prepared to go anywhere in the world in 24 hours. The efficiency offered by Lista storage cabinets helps our troops get ready fast. ”

Richard Snow
Technical Sergeant,
Schriever Air Force
Base

At Schriever Air Force Base, the Security Forces Squadron is charged with protecting the base and providing ground defense. The Squadron warehouse once utilized inefficient shelving and nesting boxes to store its valuable equipment. Now, stacked Lista modular drawer storage cabinets and shelf cabinets, and a Lista issue counter help Schriever to maximize organization and keep everything from night vision goggles to Kevlar helmets to ammunition safe, secure, and accessible to authorized personnel. The rows of Lista cabinets take up a lot less space than the previous equipment, and the lockable and labeled drawers provide a completely controlled storage system.

At Lista, our modular approach lets us create rugged, durable workstations that exactly suit your needs. Below the worksurface, you can choose from a wide array of cabinet footprints and heights and drawer interior configurations, plus you can opt for hinged doors with shelves, or a mobile base. You can also build up from the worksurface, choosing from a variety of riser shelves and workbench tops.

Lista Helps Diplomatic Security Training Annex Secure Efficient Workspace

The US State Department was transforming a dormant building into a new Technical Training Annex, and they needed lab workspace systems that would maximize their somewhat limited space. By working with an array of workbenches and cabinets from Lista, the department's facility manager was able to create a space-efficient, aesthetically pleasing workspace conducive to hands-on learning. Workbenches with butcher block

worksurfaces house an array of electronics equipment – everything from diodes to large control units – with drawers custom configured to create an organized home for electronic parts, accessories and soldering tools. Mobile benches bring even more flexibility to the facility, as they are moved from lab to lab depending on need.

“Lista's superior craftsmanship and the versatility of their workstation solutions were the deciding factors in our choosing Lista over the competition. Thanks to Lista, we've optimized the space in our training labs.”

Jim Sutton
Section Chief and
Facility Manager,
Diplomatic Security
Training Center

When you work with a wide array of different sized tools, parts and equipment, Lista's Storage Wall® system provides an organization-enhancing storage solution. The amazingly efficient Storage Wall system frees up work space by maximizing vertical storage space. And by combining shelves and drawers with wide-span beams and roll-out trays, this efficient Lista system lets you securely store the biggest and smallest of items together in a logical and accessible manner.

Repair Storage Reaches New Heights at Naval Air Depot

At the Production Control Center of San Diego's Naval Air Depot, precision is essential: precision modification and repair of tactical air navigation transmission boxes, and precision organization of test equipment and parts. Lista's Storage Wall system is precisely the storage solution that the Center needed. With its efficient vertical storage, the system freed up floor space at the Control Center. The system's flexibility allows the Center to reconfigure its storage to suit the wide array of different-sized equipment it stores prior to repair, while roll-out trays behind locked doors provide secure, ergonomically sound storage for heavier items awaiting future maintenance.

“ From circuit cards to large electronic items, the Storage Wall system provides a temporary home to over 2,500 different items. Some of these can weigh as much as 80 lbs. each, so weight-bearing capacity is an essential storage feature. Also, as we are a high visibility area for tour groups, aesthetics is of primary importance. ”

Kit Childers
Electronics Foreman,
Naval Air Depot
North Island

For applications requiring organized storage plus mobility, Lista mobile cabinets provide safe and secure storage and transport for your parts and tools. Lista mobile cabinets offer the same flexibility, security and functionality as our stationary cabinets, while allowing technicians to bring tools and equipment right up to the work area. This eliminates the walk to and from cabinets and, thus, results in increased productivity.

NASA Project Takes Off with Help from Lista Workspace Solutions

When NASA was developing their X-38 emergency crew return vehicle, the first human space craft developed in the last two decades, they needed a state-of-the-art facility in which to house this project. A key element in this facility was Lista's organized, secure and accessible storage

systems. Lista modular drawer storage cabinets offered NASA the unique ability to store a wide range of different sized parts and tools in the same compartmentalized drawers. Lista mobile cabinets offered X-38 technicians a heightened level of accessibility, with a ribbed mat or butcher block top providing a practical work surface. The entire system also met NASA's aesthetic requirements, so important given the many tour groups that patrol the facility.

66 NASA only aligns itself with quality manufacturers. The tools we use to build our vehicles are extremely important. That's why we chose Lista – we knew Lista products had the high quality and durability we needed. 99

David Young
NASA Manufacturing
Engineer,
Johnson Space
Center

From cabinets and mobile workstations to Storage Wall® systems and workbenches, Lista storage and workspace systems provide integrated solutions that are perfect for a wide variety of applications. With their modular design, sub-dividable drawers and variety of security options, these products will provide your operation with decades of convenient, highly organized storage of tools, supplies, equipment and parts.

NASA Kennedy Explores Space Savings with Lista Advanced Storage System

At this NASA Kennedy Space Center research lab, their former “hodge-podge” of storage products took up a lot of space, and the vast array of tools, instruments, parts, blueprints and documents were not always easy to locate. The new Lista system, comprised of Storage Wall® systems, workbenches with laminate worksurfaces, and modular drawer cabinets, has brought astronomical improvements in storage efficiency and organization to the lab. Custom configured drawers provide a safe and secure home for gages, welding tools and other precision instruments. And the lab has a professional, cohesive look – especially important when you’re visited on a daily basis by teachers, scientists and tour groups.

“Lista’s storage and workspace systems have allowed us to consolidate our equipment storage, freeing up space and making our labs much more organized.”

John Poppert
NASA Division Chief,
Development and
Testing Lab
Kennedy Space
Center

Lista lifetime warranty. *Lista's confidence in the quality and durability of our materials and workmanship allows us to offer a lifetime warranty on materials and workmanship. Please ask your Lista representative for a full warranty statement and details.*

Solutions Designed to Meet your Needs

Free design services. *Lista's engineering and design team is ready to provide you with a detailed plan for your individual workspace and storage needs.*

Lista offers detailed solutions designed for efficiency and future flexibility. We provide systematic solutions for a whole range of needs, from the storage of small tools to complete space-efficient, productive work environments. Our years of experience in a wide variety of government and military facilities will prove profitable to you.

GSA Contract. *Lista's contract number is GS-27F-5061C. Our CAGE Code is 57617. Lista International Corp. accepts the GSA Smart Pay or Government Purchase Card (GPC) and is available on the GSA ADVANTAGE Program.*
