- **Clifford No. 6-504-0-20**

This equipment is used for checking the performance levels of both Telephone and Computer cable installations.

Having reliable testing tools for "trouble shooting" either voice or data lines is critical for any contractor or maintenance technician. These products from **Ideal® Industries** reduce the occurrence of common wire errors and allow the installer to focus on issues of code and standard compliance.

### Test Sets Designed to Meet Craft Standards

All IDEAL test sets are made from fiberglass-reinforced ABS to withstand rugged use. The moisture resistant case ensures reliable performance under the most demanding weather conditions. A high impedance monitor feature (above 120KOhms) helps prevent accidental interruption of data flow if accidentally connected to a digital/data circuit.
