The Harper Freestanding Birth Pool By Waterbirth Technologies, LLC

PO Box 650 ▪ Wilsonville, OR 97070 ▪ Tel: 503-673-0047 ▪ Fax: 503-673-0029

It has been called "the Cadillac of Labor and Birth Pools." Available as a mobile or permanently installed unit, the *Harper Freestanding Birth Pool* can easily service a small birth center or a bustling city hospital. This sleek unit is convenient and efficient for staff as it provides access to the client from every angle. The mobile unit wheels from room to room with ease and is ready to use in minutes thanks to its quick-disconnect fill and drain hoses. Its sturdy yet light-weight aluminum frame is finished with KYDEX® - a lightweight, high-impact, fire-rated material which is commonly used for high performance medical equipment. Hospitals, birth centers, and military bases all over the country have chosen to virtually eliminate their construction costs by purchasing this self-contained labor and birth pool.

Standard Features Include:

- 74" long, 44" wide, 33" high cabinetry

Drain Configuration: Drain is in the middle of the bath. Cable waste & overflow attached to side at top. Drain piping is 1" standard FNPT.

Filling: Hot and cold are brought into one 3/4" FNPT pipe.

Our design team looked at every bath tub and birth pool available for hospitals before creating the Harper Freestanding Birth Pool. Our two main goals were functionality for both mother and nursing staff, and design acceptance. The design fits in every birth room, looks like a part of the room, is familiar to the mother because it looks like a luxurious bathtub and is the same size as a birthing bed.

If your birth team wants to remodel bathrooms or build in a different unit, our designers are available for consultation. We have a selection of several other Birth Pools for drop-in installation that qualify as deep immersion baths for labor in water. We love to save hospitals money and get them the right equipment!

Let our 20 years of experience with water immersion in maternity care work for you!
