

Introducing the Family of ISO Container Inserts – A Revolution in Material Handling Efficiency

Revolutionize your shipping, warehousing, and material handling operations with the insert that brings unparalleled versatility to any containerized shipping operation

Container inserts grant you the following benefits:

- Patented design yields unmatched strength and durability
- Sling load under helicopter, between vessels, or straight to the front lines
- Sized to maximize unitized storage space in standard ISO shipping containers
- Easy loading and unloading with variable height shelves and independently removable doors
- 'Knocked-down' return shipment with all components included for efficient retrograde transport
- No tools required for quick assembly or disassembly
- Improved versatility for loading operators and end-users — all with pilfer-proof security
- Available with waterproof covers, easy-to-use casters, and additional shelves

Standard ISO Container Pallet

Quadcon Insert inside CMCI Quadcon Container

GSA Prices Available for Qualified Government Buyers

Container inserts will drastically improve your shipping operation:

1. **Load** the insert from the convenience of the parts-storage warehouse, not the inside of a hot container
2. **Fit** five 9080 pallets inside a 20-ft container or two inserts inside a Quadcon, without blocking or bracing
3. **Protect** the contents with an available waterproof cover
4. **Deploy** from the ISO container to the front line, or use as a ship-to-ship re-supply
5. **Move** without a forklift, with available casters
6. **Unload** when and where necessary
7. **Collapse** for easy and efficient retrograde shipment

ISO Container Tire Rack

Use this rack to store and transport oversized vehicle tires inside standard ISO Containers

- Sized to fit any size tire in any size container
- Stackable
- Avoid labor and time to move tires individually
- Sized to maximize ISO container storage

Standard MTRV Tire Rack

- 90" wide x 58" tall
- Holds five 53" MTRV tires, plus one on top
- 200 lbs. tare
- Durable galvanized finish

ISO Container Aluminum Loading Ramp

Features at a Glance

- Fits in the 3" void between the ISO container pallet and the container door
- Minimum 12,000 lbs. capacity
- 37" long; 84" wide; 2.1" thick; 120 lbs.

Lightweight, Versatile, and made for a HMMWV: The 8232 Vehicle Pallet

A lightweight version of our popular ISO container pallet, this pallet fits snugly inside the bed of a standard HMMWV. Weighing in under 400lbs., with a payload of 2,000 lbs., this pallet is rugged and versatile.

Features at a Glance

- Patented construction is strong and durable
- Transportable by land, sea, fixed wing air and helicopter
- Rated for one ton payload, tested to over 8,600lbs.
- Stackable up to five high for warehouse storage
- Assembles and disassembles in minutes, all without tools
- Four lift and eight tie down points ensure stable load
- Waterproof cover available to protect contents

All Container Inserts Meet or Exceed:

- MIL-STD 209J: Lifting and Tie Down
- ASTM-A-123: Galvanize Finish
- MIL-STD-1971: Internal Aerial Delivery
- STANAG-3542: Helicopter Sling Transport

Extended Length Pallets: We excel where others fail

4' x 10' Flat Pallet

Our extra-long pallet excels where wood and plastic fail. You get a clean, flat, unbending surface that stays level to protect its load. Optional folding legs available for weight-sensitive materials.
