Shaping How You Communicate Tomorrow [SM]

Voice, Data, Video, Broadband:
Products & Services Built with Integrity

Where Total Communications Solutions Come Together – *Engineering, Networking, Broadband Services*

When it comes to tying together all of your information technology needs through one provider – Integrisys Communications Group, Inc. offers more than the typical IT provider. That's because Integrisys' staff has the application expertise and hands-on experience in both current and emerging technologies – including voice, video, data and broadband. We offer flexible solutions that ensure your enterprise long-term productivity with total scalability and interoperability.

Welcome to the 21st Century

Many companies recognize that the communications needs of the 21st century are changing with lightning speed – from potential deregulation of broadband supported by federal economic initiatives to wireless applications and extremely challenging, new data security issues.

Engineering Services Division – Supporting New & Emerging Technologies

It is now more important than ever that you partner with a company that can also move with lightning speed to employ and deploy the technologies that will keep you on a level playing field. In fact, at Integrisys, emerging technologies that can be retrofitted for today and tomorrow is our expertise. The Engineering Services Division at Integrisys focuses on designing and engineering products and services based on new and emerging technologies to support the changing communications needs of enterprises.

Turnkey Solutions Through:

- Design, Installation and Support of Fiber Optic, Copper and Wireless Network Systems
- Broadband Community, Satellite and Master Antenna Television Systems
- Closed Circuit Television and Audio/Video Systems
- Control and Access Systems

Specific Services for Data, Video, Voice and Broadband Network Services Include:

- Network Survey and Design
- Installation and Activation
- Equipment Sales, Configuration and Support
- Broadband Headend Engineering
- Network Standards Testing and Certification
- Network Troubleshooting
- Service Support Contracts
- CATV Proof-of-Performance and FCC Testing

Partners and shareholders alike must have utmost confidence in their IT partners – after all, they are not only managing one of your most valuable resources and assets – your technology infrastructure – they are also ensuring that it is secure, efficient and can evolve with future needs.

Networking Services Division – The IT Backbone

Integrisys' Engineering Services Division often works arm-in-arm with our Networking Services Division who provides the backbone and structured communications wiring platforms that meet or exceed industry standards set forth by the Telecommunications Industry Association (TIA), the Institute of Electrical and Electronics Engineers (IEEE) and the Building Industry Consulting Service International (BICSI) – to name a few. Networking Services Division provides all hardware, cabling, installation and servicing for data and network applications and infrastructures, security surveillance systems, telephony and more.

Aerial Outside Plant (OSP) Design, Engineering and Installation

- Fiber Optics
- Multi-Pair Copper
- Hybrid Fiber – Coax (HFC) Broadband Video

Underground OSP Design, Engineering and Installation

- Fiber Optics
- Multi-Pair Copper
- HFC Broadband Video

Infrastructure Design, Engineering and Installation

- Broadband Video Headend and Distribution Design, Engineering, Installation and Proof-of-Performance Certification
- Fiber Optic, UTP, Multi-Pair Copper and Coaxial Infrastructure Design, Engineering, Installation and Testing
- Building and Campus Ethernet Based High-End Building Automation Systems for HVAC Equipment, Lighting Control, Integrated Access Control Design, Engineering, Installation and Proof-of-Performance Certification
- Design and Engineering Collaboration with Local CATV System Provider, AutoCAD Based Documentation

Harnessing Broadband

But that's not all – our expertise in broadband and how to effectively harness and use this technology to shape your current needs that will provide pathways for future needs – is our forte. Most other IT providers outsource this piece or do not have the expertise to tie it into a complete communication solution. From implementing a private master antenna system or even just pure execution of cable TV systems for large cable companies – Integrisys has the hands-on experience to manage the behind-the-scenes technical characteristics of employing and taking full advantage of what a broadband system can offer.

integri·sys ®

Integrisys Gives Today's Businesses and Organizations Forward-Thinking, Adaptable Solutions Based on…

- *…leading edge technology and real-world experience in today's communication applications.*
- *…expertise in emerging technologies/applications; voice and video over IP (Internet Protocol), teleconferencing, and more.*
- *…proven, optimum performance and reliability.*
- *…products and services built with Integrity.*
