

Send, Receive, Manage, Archive, Track, And Protect Office Documents With Mouse-Click Ease.

RAPID DOCUMENT DELIVERY™

The first step to a significantly more efficient workplace.

Moving all kinds of business documents electronically is a critical function of today's enterprise. Unfortunately, too many businesses are still piecing together old technologies to manage it all. Stand-alone fax machines. Wasteful paper files. Space-eating paper archives. Excessive paper copies. And an accounting department struggling to reduce costs and track daily expenses. j2 simplifies the entire process, enabling you to use your existing e-mail and Internet connectivity to its full potential. It all starts with the eFax™ Rapid Document Delivery™ solution.

Move documents anywhere in the world — from wherever you are.

The eFax Rapid Document Delivery solution enables employees to send and receive faxes directly to and from the computer desktop using individual fax numbers that route through your existing e-mail system or service. Once received, you can change, annotate, sign, forward, or store documents digitally for future use. No fax

server or additional hardware or software is necessary. So moving documents between your corporate office, your field personnel, your customers or your vendors is easier and more efficient than ever.

- Minimize or eliminate equipment, software, and maintenance costs
- Increase employee productivity — no more wasted time feeding faxes into machines or waiting for faxes and confirmation receipts
- Eliminate lost or misplaced faxes
- Increase faxed document security and privacy
- Send and receive faxes at any desktop or laptop
- Put an end to copying faxes for distribution

NO HARDWARE.

NO SOFTWARE.

NO HASSLES.

RAPID DOCUMENT DELIVERY™

Simple provisioning.

Better cost control.

Finally, cost-control and easy administration is at your fingertips. Now you can manage all of your company's eFax accounts with a simple Web interface from virtually any computer.

- Provision local, international, or toll-free fax numbers to any of your employees
- Add, change, reserve, or re-assign numbers as needed
- View real-time account activity and usage
- Assign departmental codes to each user for cost-allocation

Flexible rates enable you to efficiently match company usage with growth expectations. And, of course, for bottom-line cost savings, nothing beats eFax. No more fax machine supply and maintenance costs or time spent to physically retrieve paper-based fax documents.

j2 Global – the world's largest document/fax network.

j2 is the largest publicly-traded outsourced fax service provider in the world (NASDAQ:JCOM). Since 1995, we've enabled companies to send, receive, and manage
