## LTSA-35A Fuel Oil Additive

Solving fuel problems  
one tank at a time.

Tel: 800-827-9790

# LTSA-35A

Long Term Storage Additive (LTSA)LTSA-35A is a non-phosphorous, multifunctional additive providing rust inhibition, dispersancy, antioxidant properties, color stability, and copper deactivation. Supercedes LTSA-15 and 35. Contains an advanced dispersant to greatly reduce sediment formation during storage. Especially appropriate for long-term storage of diesel fuels.

## Applications

Imparts a combination of properties to fuel oils including rusts inhibition, stabilization, dispersancy, oxidation control and metal deactivation.

## Suggested Treat Rate:

1:5,000

## Properties:

Appearance: Amber Liquid

Specific Gravity: 60°F (16°C) 0.898

Density: 7.46 lb/gal

Flash Point, PMCC, F (C):  
83°F (28)

Initial B.P., F (C) 351 (177)

## Viscosity, cSt @:

-20° F (-29° C)	333
0° F (-18° C)	220
32° F (0° C)	120
100° F (38° C)	60

## Personal Safety, First Aid, and Storage Handling:

Either concentrated or in stock solution, using proportioning pump or batch addition. We recommend copper lines not come in contact with the concentrates.
