

INTEGRATED SOLUTIONS FOR LOCAL GOVERNMENTS

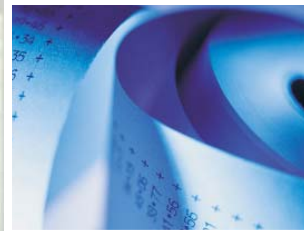

Public sector organizations face many challenges today, such as improving community services, lowering costs, managing funds, monitoring budgets and increasing productivity. A comprehensive, fully integrated software solution can be an essential element in meeting these often conflicting challenges.

Logos.NET™ meets the unique needs of public sector organizations by providing an integrated, browser-based software suite for Financial Management, Payroll and Human Resources, Utility Management and Community Development. Designed for all sizes of local governments, our solutions are built using the latest in proven Microsoft® technology.

Organizations nationwide will benefit from Logos.NET's familiar user interface, reduced learning periods, lower cost of ownership and the ability to utilize the Internet.

New World Systems®
The Public Sector Software Company

NEW WORLD SYSTEMS

1,200 Public Sector Agencies Have Trusted New World's Software for Over 20 Years

New World Systems' comprehensive, integrated Logos.NET Public Administration solution satisfies the varying needs of government agencies nationwide, from increasing productivity to streamlining processes.

For more than twenty years, New World, a leader in public sector software, has provided local governments with progressive technology. Our software helps improve operations with its workflow event-alert notification feature, an effective management tool that helps you meet deadlines.

New World is known for its stability and longevity in the software industry. Cities, counties and townships nationwide trust New World's solution to manage its financials, human resources practices, utility billing and customer tracking, and community development.

New World focuses on the unique needs of the public sector by continually enhancing technology and monitoring the needs of local government. We incorporate industry trends and customer suggestions into our solution that improve your daily processes.

Unlike many public sector vendors, New World develops its Logos.NET software suite in-house, providing a truly integrated system that reduces data entry and provides easy access to information throughout your organization.

Our commitment is to our customers' success.

Logos.NET™ Public Administration Software

FULLY INTEGRATED

The integrated Logos.NET software suite provides seamless communications between software modules and customer departments, reducing data entry and human errors. Whether you are in a centralized or decentralized environment, Logos.NET streamlines workflow and improves efficiency.

The *myTask* window automatically shows workflow items or alerts/exceptions that require action. By simply double-clicking an item, the user is taken to the appropriate approval/inquiry screen.

SERVICE & SUPPORT

New World's Professional Service and Support is the Foundation to a Successful Partnership

At New World Systems our commitment to service means we provide a strong, ongoing partnership that begins before the installation of the software and continues for many years. You can count on New World to provide the software tools and professional services you need to be successful.

Our services help customers gain maximum value from our solutions:

- New World employs experienced professionals with extensive public sector knowledge who manage the system implementation
- New World's project management teams help define the software implementation process based on your organization's specific needs, goals and priorities
- New World offers numerous continuing education classes on the fundamentals of the system and specialized classes for more advanced users
- Based on your needs, New World provides on-site training after the implementation process
- The on-line customer service website, *My New World*, provides:
 - Register new service requests
 - Check service status
 - Download user manuals
 - Access to product information
 - And much more
- The Standard Software Maintenance Agreement (SSMA) provides:
 - New, enhanced software releases and updates
 - Ongoing support services
 - Toll-free phone support
 - Remote access for customer support issues (electronic customer support - ECS)
 - On-line customer service
 - Participation in the Annual Executive Customer Conference

Proven Solutions for Government

TECHNOLOGY

New World Systems' Logos.NET Public Administration software was developed from the ground up using the latest in Microsoft .Net technology to meet the ever-changing needs of local government.

This anytime-anywhere, browser-based solution provides an intuitive, familiar, look and feel that is easy-to-use and increases productivity. Additionally, the Microsoft .Net architecture provides low total cost of ownership coupled with ease of integration to other applications with industry standard XML technology.

FAMILIAR USER INTERFACE

- Easy to use modern application
- Pull-down menus that allow the user to select from pre-defined items
- Point-and-click drill-down inquiries from summary to source documents
- Personalized navigation
- Microsoft Excel interface

STREAMLINES PROCESSES

- Built-in Alerts & Event Notifications provide a proactive management tool
- Efficient screen layout maximizes productivity
- Customizable screens and navigation
- Easy access to all applications
- Fully integrated to reduce data entries and errors

NEW TECHNOLOGY

- Microsoft .Net
- Windows 2000/XP
- SQL 2000 Server database
- IIS Web Services
- Low cost of ownership
- Report wizard
- Reliable/scalable solution
