Introduction:

Polishing, Buffing, & Shot Blasting Specialists

From small parts to large parts, out-sourcing your metal finishing needs to Mann Metal Finishing can improve your bottom line. Put our many years of experience in **Polishing, Buffing, Shot Blasting, Grinding, and Vibratory Finishing Services** to work for your company.

Allow us to demonstrate how out-sourcing your metal finishing needs to Mann Metal Finishing can increase warehouse space, market share, and profits - while decreasing production time, work force, overhead, liability, management concerns, and stress.

Some of the industries we serve: automotive, furniture, appliance, semi & "pickup" truck accessories, rims, motorcycles, bumpers, plumbing, marine, and more. We provide high-quality / high-volume automated metal finishing services for die casters, steel stampers, platers, extruders, anodizers, powder coaters, wet coaters, and more.

We can provide steel or zinc shot blast finish, vibratory finish, satin finish, or any other surface finish from a #1 to #8 finish. Whether it's the final #8 mirror finish or something in between for plating, anodizing, wet coating or powder coating, we have the resources and experience to fulfill your needs. We can prepare or finish any part: aluminum, zinc, carbon or stainless steel.

Let our innovative engineering department provide your company with the automated, high volume, low cost solution; you expect and your company deserves.

If you're a manufacturer, we can provide powder coating, wet coating, anodizing, and plating finishes through our strong alliances with many other finishing companies.

If you're a final metal finisher interested in the benefits of out-sourcing your "pre-finish" needs, we welcome the opportunity to assist you with your finishing requirements while developing a mutually beneficial relationship.

High quality standards, superior customer service, competitive prices, on time delivery, and a reputation to prove it - since 1973. That's why Mann Metal Finishing is the only metal finishing service provider you'll ever need.

* Complete Finishing Needs

From a #1 to #8 mirror, and everything in between ...

- 12+ steel & zinc shot blasting systems
- Vibratory finishing equipment
- 40+ polishing and buffing lathes
- 60+ highly qualified polishers and buffers
- Numerous automated polishing and buffing lines for small to large parts

We can also provide powder coating, wet coating, anodizing, and plating finishes through our strong alliances with many other metal finishing companies.

* Steel & Zinc Shot blasting

If a polished or vibratory finish is the "look" you need, let us demonstrate the possible savings available with steel or zinc shot blasting. When you combine different finishes, such as polishing and shot blasting, the results can be very cost effective. This type of process can also decrease scrap percentages.

Our commitment to cost-saving metal finishing has opened the eyes of many!

* Polishing

We've been polishing for over 25 years. Our experience and high quality standards are unsurpassed, our capabilities are endless.

* Buffing

We start with our polishing, if needed, and then add our hard buffing process, followed by our bright buff finish. The final results will give you the mirror-look you're looking for!

We can provide you with either top quality completed parts or parts ready for plating.

* Vibratory Finishing

While shot blasting is usually the most cost-effective finish available, vibratory finishing still has many advantages. Each different media type will give you a little different look. The "Vibe" look is truly unique.

* **Satin Finishing**

From rough grit to smooth grit, the satin finish is one of a kind. Satin finishing is closely related to a polished finish.

* **Assembly**

Many castings need more than a finish. Some may require hand-assembly.

Save money and transportation time with our assembly services.

* **Customized Finishing**

When you know the look you want, but don't know how to get there, let us help. With our many years of metal finishing experience, we've been able to design machines to run parts of any shape, size, or weight.

* **Free Sample Testing**

We will gladly process and ship sample parts free of charge!

Examine several different sample finishes for consideration -- choose the look that best fits your needs.

You simply decide which finish best fits your needs. We'll take care of the rest.
