

## *Anheuser Busch goes WIDE*

Quince Imaging recently provided cutting edge widescreen production for the Anheuser Busch Convention, held March 2-5 in Dallas Texas.

The Quince Imaging - Spark Agency team provided the highest quality projection and wide screen production equipment and expertise to provide a truly seamless...spectacular image on an 18 x 65 foot Stewart seamless FilmScreen.

"The fact of the matter is that while others use smoke and mirrors, Quince imaging uses state of the art technology and quite frankly, the most savvy engineering staff in the world to deliver to our customers a quality that is incomparable." said the Director of Quince Imaging, Scott Williams.

"Over the course of the event, we incorporated countless elements of video, HD and graphics without difficulty. During this event, we display a 16 x 9 window with video shot in HD wide format. Our customer preferred the window in the center, but it can be placed anywhere on the widescreen."
