

**SPECTROMETERS** for Extreme Vacuum Ultraviolet material test and calibration systems.

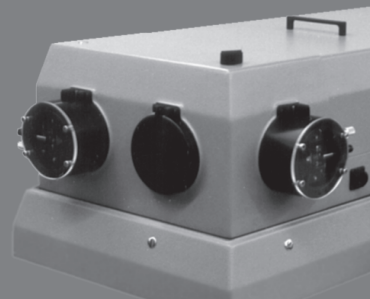

Vacuum sources and detectors for high resolution and high energy applications.

**MONOCHROMATORS** for Deep & Vacuum Ultraviolet

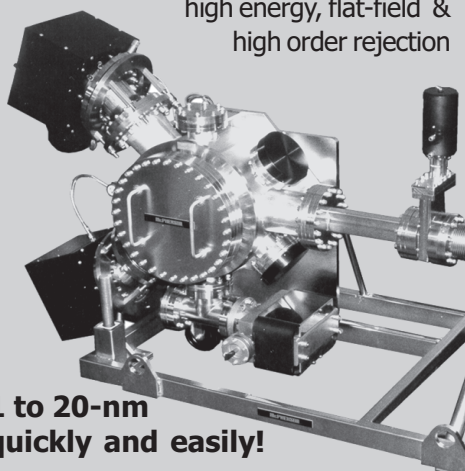

**Model 234/302** 0.2m f/4.5 vacuum spectrometer for CCD or scanning

**SPECTROMETERS** for Imaging & High Resolution in the Ultraviolet, Visible & Infrared

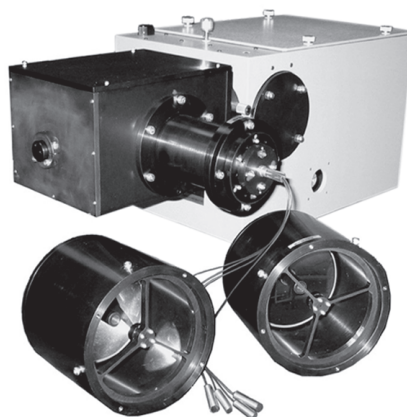

0.3 to 2-meter focal length imaging systems with low f/nos. Double pass optics available for best dispersion.

**SPECTROGRAPHS** for EUV high energy, flat-field & high order rejection

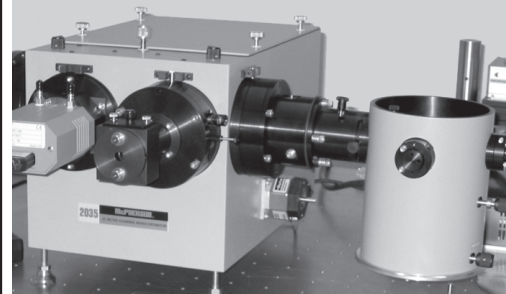

**1 to 20-nm quickly and easily!**

**REMOTE SENSING** Visible & Infrared Imaging

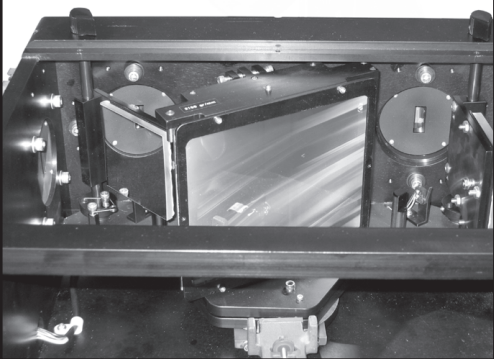

**PHOTOLUMINESCENCE & UV RAMAN** systems with fast f/# for light collection & better sensitivity.

**Model 2035** 0.35m f/4.8 imaging spectrometer for CCD or scanning

**HIGH THROUGHPUT** f/4 0.5m Model 205 spectrometer for imaging or scanning in **LOW LIGHT** and **HIGH SPEED** applications.

## **MONOCHROMATORS & IMAGING SPECTROMETERS**

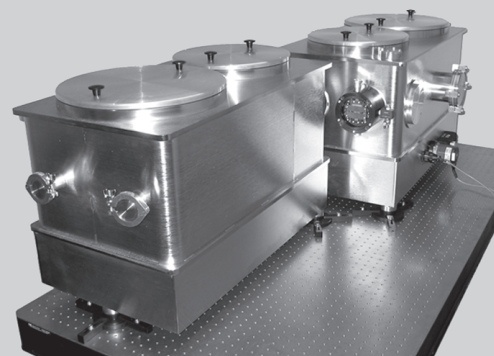

for the Vacuum and Soft x-ray and the Visible to Infrared (LWIR)

Instruments & complete applications-oriented spectral systems. Measure and analyze reflection, transmission, atomic emission, Raman, photoluminescence, fluorescence, high laser harmonics, and more.

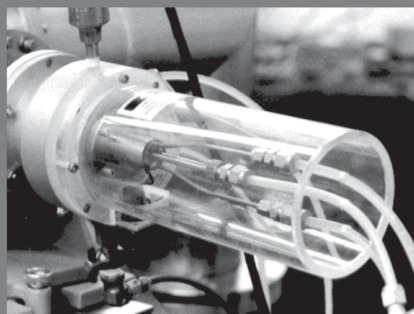

# **McPHERSON™**

7A Stuart Road, Chelmsford MA 01824  
1-978-256-4512, 1-978-250-8625 fax

**TRIPLE MONOCHROMATORS** and **DOUBLES** with low stray light and good f/nos. for Spectral Radiometry, Raman and Calibration applications.

**PHOTOEMISSION LIGHT SOURCE**

**Model 629** hollow cathode lamp for 30 to 200-nm. He II (40.8-eV) & many other lines from gases. Windowless.
