

Mitalena Coffee Collection

Mitalena keeps a wide variety of coffee beans from all around the world. Our coffee stock ranges in both quality and cost from an expensive pedigree of estate coffees such as Jamaica Blue Mountain and Hawaiian Kona Fancy to in-house economical blends of select beans. A few well-known trade names in coffee are Colombian Supremo, Kenya AA, Costa Rican Tarrazu, Guatemalan Antigua, Nicaraguan Matagalpa, and Indonesian Sumatra.

Mitalena Coffee Processing

Although utilizing modern technology in operation, our coffee roasters are designed according to the European roasting system by using single batch, slow roasting, air-cooling methods. This traditional "old world style" roasting process has been proven to produce coffee of unmatched smoothness and aromatic quality. This process removes all the layers of chaff and prevents smoke penetration into the beans. The result of such a process is perfectly roasted coffee with aromatic content and superior flavor even in decaffeinated coffee.

The cultivation of coffee trees and processing of the coffee beans vary from country to country and from region to region within a given country. The degree of a roast and the blend
