OneSpace.net

OneSpace.net is a set of engineering tools designed to help product development teams work together more efficiently, even when teams include designers in remote locations, subcontractors, supply chain partners, marketing and sales departments, and customers.

Product Features

Organizing Project Data for Secure Collaboration
- Set up project folders and team members
- Fill project folders with any project related data
- Automatic file versioning and flexible file permissions
- Scheduled CAD file conversions
- Tracks team assignments
- Leverages Microsoft Outlook for automatic subscription and change notification
- Threaded discussions for project related topics

Scheduling, Organizing and Managing Project Meetings
- Schedule and conduct web based meetings
- Specialized application sharing for real-time meetings (no data translation required)
- Capture markups, notes, decisions and tasks for all real-time meetings
- Integrated with Microsoft Outlook for meeting scheduling and task assignment
- Export collaboration results to Microsoft Outlook, the project workspace or downstream applications leveraging XML web services

Viewing, Assembling, Inspecting, 3D and 2D Data
- View 2D drawings and 3D models
- Inspect, analyze, and measure based on real geometry
- Supporting industry standard CAD formats:
  - Import and Export: IGES, STEP, ACIS, DXF, and DWG
  - Export: VRML and STL

Web Services
- Certified as a Microsoft .NET Connected application
- Advanced Web based distribution and updating
- Automatic update and installation of clients over the Web via a deployment service

Secure Project Data Access
- Determine access and team member rights individually for projects and folders.
- Full 128bit SSL data encryption for all communications inside and outside the firewall

Optional CAD Converters
- Additional CAD converters are available for SolidWorks®, CATIA®, I-deas®, Pro/ENGINEER®, and Unigraphics®

Ordering Information

OneSpace.net	C000
OneSpace.net Support	C000A

Prerequisites

Microsoft products:

- Internet Explorer 5.5 or above

- Internet Information Server (IIS)

- Windows Server™ 2003

Optional:
- Microsoft® Outlook®

System Requirements

OneSpace.net 2004 supported platforms:
- ☑ Windows 2000™, Service Pack 3 or above
- ☑ Windows XP™ professional, Service Pack 1 or above
