

Why Proshred?

- **The Curse of the Mini-Shredder.** It's slow, jams easily and is secretly eating away at your profitability – it's the mini-shredder. PROSHRED eliminates the need for shredders at every workstation with free, locked security consoles that fit a professional office setting.
- **WARNING:** Do not be deceived – Haul-away shredding services may not be HIPAA and Gramm-Leach-Bliley (GLB Act) compliant. Once the documents leave your business, you are responsible. That's why PROSHRED ALWAYS shreds on-site – it eliminates your liability.
- **Guaranteed Security.** PROSHRED secures your documents in locked, security consoles located at your business, then shreds on-site upon demand or by schedule. You cannot find a more cost-effective, secure, and efficient document destruction system.
- **Enhanced Productivity.** Employees should not be shredding documents – they have work to do. PROSHRED allows you to keep employees focused on getting work done, and leave the document security and destruction to our bonded, onsite Security Technician.
- **Onsite, Out of Mind.** The risk of a security lapse or regulation violation is too great. Therefore, your sensitive documents should never leave your premises until they are destroyed. PROSHRED on-site shredding resolves your worries by keeping your documents completely secure until they are professionally shredded at your business.
- **Stop Wasting Money On Storage Space!** How many old records, bills, documents, and other sensitive materials are you keeping right now? Document storage takes up valuable office space and costly, off-site storage space. PROSHRED professional on-site shredding will reduce, if not eliminate, the need for unnecessary document storage space.
- **The PROSHRED Certificate of Destruction.** This is one document you will want to routinely save. Every time we come to your business to shred, Proshred will provide you with a written, dated, PROSHRED Certificate of Destruction for your HIPAA or GLB Act compliance records.
- **Recycling Is Not Secure Document Destruction.** Recycling companies do a lot of sorting to ensure that they get the best possible price for your paper. That sorting increases the number of people who handle your documents and the risk for a security breach. Under GLB Act and HIPAA, you may be personally liable for such a security lapse.
- **Why The PRO in PROSHRED?** Because document destruction is all we do. In fact, we invented Mobile, On-site Shredding in 1986. We are one of the leading Shredding companies in North America with offices in the U.S. and Canada. Our Security Technicians are bonded and trained.
- **The Penalties Of Not Doing It Right?** With the implementation of the Health Insurance Portability & Accountability Act (HIPAA) on 4/14/03 and the 2001 Gramm-Leach-Bliley Act, shredding is not only regarded today as a best business practice, there are huge penalties for not effectively destroying data and sensitive paper.
- **The Cheapest Insurance You Can Buy!** The digital corporation runs on data and our economy has seen great jumps in productivity because of it. However, the liabilities of that data are as equally profound. Identity theft and related fraud are on the rise and the regulated, or unregulated company that slips up risks its own demise. That fact alone, makes PROSHRED Security's professional, on-site shredding services the cheapest insurance you can buy!
