Product Information - *PacWest C4I, Inc is a referral member with the following companies;*

Armor Systems International

Aztik 100T Peel n' Stick© Armoring System, allows for fast application to any smooth surface within a military, law enforcement or private vehicle for instant threat protection.

Swan Island Networks Inc.

Seeks to make America safer by providing a highly secure, software-based communications system for government agencies, first responders, keepers of critical infrastructure and of others engaged in Home Land Security.

NQL Technologies, Inc.

ContentAnywhere is a bundled Enterprise Content Management solution that retrieves content from multiple structured or unstructured data sources and delivers that content to any conduit in the precise form needed by the user.

The VIGILOS, Inc.

Enterprise physical security software solution that integrates all forms of devices (cameras, card readers, keypad, biometrics devices, sensors, barcode readers, cash registers, etc.), into a secure web-based information management application, accessible from any location having broadband throughput, to initiate, control, monitor and alert key personnel through any electronic communication devices (email, phones, PDA, pagers, etc.). The physical security software is designed for the large, multi-site enterprise. It is an open architecture, multi-tier database platform based on Linux and PostgreSQL at the site, and with UNIX and Oracle on the hosted back end, so that it integrates a host of physical security devices from multiple manufacturers. The Vigilos software captures digital video on standard PC-based hardware and eliminates the need for proprietary DVRs, multiplexers, and switches.
