Call US! Toll Free **1.866.895.MAPS**

When seconds saved mean lives saved, **FIREbaseView® 5** saves you seconds.

When you're responding to an incident, you don't have time to frantically flip pages, or to sort through records in a database. You need information, and you need it now.

Pull up a predefined view, click on an address, and you're in command, with everything you need to know at your fingertips.

Review your routing notes, look over the floor plan, and see pictures of the structure, with just the click of the mouse. Mark an evacuation radius, see the surrounding area, highlight a trouble spot, and more, on the scene, at the moment.

Features

- Find Street Command
- Mouse Wheel Dynamic Zoom & Pan
- DOT Guide Evacuation Radius Button
- Address Marker Button
- Highlighting
- Pre-Defined Zooms
- One Click Multiple Linked Files
 - Pre-Fire Plans
 - Digital Pictures
 - Other Linked info.
