

## **Preventative Maintenance Program**

### **What is a Preventative Maintenance Program?**

Our customer Preventative Maintenance Program is designed to keep your equipment working safely and efficiently and to limit the frequency of repairs through regular maintenance, calibration, lubrication and inspections. It is a misconception that since a piece of equipment is under a manufacturers warranty a service agreement isn't necessary. The best analogy is your vehicle. Although the vehicle is under warranty, the dealer does not pay for oil changes, tire rotation, alignments, tune ups, etc... All equipment has a manufacturer suggested Preventative Maintenance Schedule which should be done weekly, monthly and daily from the day you receive your equipment. We offer a customized program designed for your specific needs. Upon contract approval, your facility and its equipment will be entered into our database to track the service history and inventory of your equipment.

### **How will it benefit my facility?**

You will find that regular servicing of your equipment pays for itself!

- No more "Out-of-Order" signs
- Lower repair costs on older equipment
- Equipment lifespan is greatly increased
- Create a safe workout environment limiting potential liability
- Higher client retention
- Greater return on investment!

During each preventative maintenance visit, ALL equipment covered under the agreement will be inspected for safety, thoroughly cleaned in the interior as well as the exterior, lubricated and adjusted according to manufacturers specifications. Upon the completion of your visit we will complete a Preventative Maintenance Checklist that will indicate any need for repairs that were discovered to avoid any down time in your facility.

### **What is done during the preventative maintenance program?**

We work with you and make a maintenance schedule that fits your needs with monthly, quarterly, or bi-annual schedules.

<p style="text-align: center;"><b>TREADMILLS</b></p> <ul style="list-style-type: none"> <li>• Inspect and adjust running belt</li> <li>• Inspect Deck for wear and wax levels (clean wax nozzles)</li> <li>• Vacuum Interior / Exterior</li> <li>• Clean Hood</li> <li>• Clean Frame</li> <li>• Inspect Drive Belt</li> <li>• Inspect and lubricate rollers</li> <li>• Check motor brushes</li> <li>• Lubricate lift</li> <li>• Inspect Wheels</li> <li>• Inspect shock absorption system</li> <li>• Diagnose errors</li> <li>• Check mileage and/or hours</li> <li>• Check amp draw</li> </ul>	<p style="text-align: center;"><b>ELLIPTICALS</b></p> <ul style="list-style-type: none"> <li>• Clean Hood / Shroud</li> <li>• Vacuum Interior</li> <li>• Clean Frame</li> <li>• Check Tracks</li> <li>• Lubricate Lift</li> <li>• Inspect / Clean Wheels</li> <li>• Inspect / Clean Rollers</li> <li>• Check Flywheel</li> <li>• Inspect Drive Belt</li> <li>• Diagnose errors</li> <li>• Check stride</li> <li>• Record Usage/ Hrs</li> </ul>	<p style="text-align: center;"><b>STEPPERS</b></p> <ul style="list-style-type: none"> <li>• Clean Covers</li> <li>• Clean Frame</li> <li>• Vacuum Interior</li> <li>• Clean Friction Belt</li> <li>• Grease Pivots</li> <li>• Check Springs</li> <li>• Check Cables</li> <li>• Lubricate Chains</li> <li>• Check shocks</li> <li>• Check Electrical Connections</li> <li>• Check Alternator Brushes</li> <li>• Check handrails</li> <li>• Diagnose Errors</li> <li>• Record Usage / Hrs</li> </ul>
