

Residential Solar Electric Systems

EcoEnergies is a full service renewable energy company, providing custom design and installation of solar electric and wind systems. EcoEnergies has installed more than 100 grid-tied solar electric systems throughout the Bay Area and Central Coast. With solar electricity you can take advantage of net metering, which allows you to run your electric meter backwards and reduce your electric bill to zero. Battery back-up can provide power to your essential circuits if there is a utility outage.

4.0 kW AC Grid-connected, net metered, battery back-up

31 kW AC Grid-connected, net metered battery back-up

9.8 kW AC PowerGuard thermally insulating solar electric roof tiles. Grid-connected, net metered, battery back-up

2.0 kW AC Grid-connected, net metered

... more examples:

9.0 kW AC Grid-connected, net metered,
battery back-up

1.6 kW AC Grid-connected, net metered,
battery back-up

6.2 kW AC Grid-connected, net metered

2.0 kW AC Grid-connected, net metered,
battery back-up
