Panorama Window Options

Modular unit construction for easy assembly

Optional Items

<p>Adjustable Tri-jet Shower Head</p> <p>European desinged shower head system with a vertical bracket support structure. Shower head can be detached and directed by hand or fixed virtually any direction from the bracket support system</p>	
---	---

<p>Six Adjustable Massage Jets</p> <p>Six adjustable massage jets are positionned on the coutured back plane of the shower cabin. Each jet can be individually adjusted to a variety of different spray features and different directions.</p>	
---	---

<p>Aroma-therapy System</p> <p>The Evolution features an integrated aroma-therapy system. In connection with the steam system, the fragrances are deciminated via the discreet steam valve. Scandia offers a wide range of specially formulated fragrances.</p>	
--	---

The E-400 steam room system is a unique modular system that supports a variety of different room configurations.. The E-400 features modular back wall panels with integrated seats, light bronze tinted tempered safety glass and a one-piece glass door. The four person unit comes with a one piece dome ceiling unit while larger units feature modular ceiling. Optional items include a chrome European shower head, six adjustable massage jets and an aromatherapy system. The E-400 features a 4KW - 18KW steam generator with digital controls. This flexible design is ideal for commercial steam room applications. Unlike tile, stone and other commonly used materials, Scandia steam rooms have zero heat loss and do not deteriorate after 2-3 years. Scandia guarantees ten years of trouble free construction.

Scandia Evolution

Product Comparison

Scandia's steam room line is appropriately called the "Evolution" product line. Scandia believes that the conventional steam room construction will give way to the next generation of multifunctional and highly efficient modular steam rooms. Historically, new and innovative products have commanded higher prices, and as new products become more mainstream - prices decrease. This may hold true with competitive products, Scandia, however, is breaking this axiom. To Scandia, the term evolution refers to innovative products, superior design, more features and better prices. Scandia products embrace the ideals of evolution, so to do Scandia customers. Scandia owners are evolved and educated, and they make intelligent buying decisions. In an independent side by side product comparison with **Tylo**, made by a leading retailer pool and spa products, Scandia was the clear winner in design, features and price.

Scandia "No Games" Guarantee

Scandia guarantees that there are no hidden costs and misleading or confusing pricing strategies. All Scandia steam systems pricing includes the steam generator, digital controls, aromatherapy and many for features all standard and optimized for each unit. All Scandia steam rooms come with the necessary hardware and components for assembly. Scandia steam generators are complete with integrated digital controls and aromatherapy system. Scandia steam units do not include wires/wiring for connections with power source (e.g. breaker box). Scandia steam units do not include plumbing supplies for connections between water source—generator and generator—steam heads. These components are standard and non-proprietary and should be provided by your licensed plumber and electrician.
