

Service Center Introduction and Capabilities

A-L Compressed Gases of Portland Oregon, is one of the nations first Warranty Level Service Centers authorized for sales, service and warranty repair of Biosystems brand gas detection monitors and are the only authorized warranty service center in the Northwestern United States. We are also factory authorized to provide warranty level service across the United States for Survivair's full line of Supplied Air breathing systems, Self Contained Breathing Apparatus and Air Purifying Respirators. We are the exclusive authorized sales, service and repair center for Thermo GasTech Incorporated's, full line of portable and fixed gas detection systems in the Pacific Northwest. Our organization is authorized to sell and service Thermo GasTech equipment throughout the entire United States and was the first service center nationwide to receive an advanced level of repair certification from Thermo GasTech. A-L Compressed Gases Inc., is also a distributor and authorized service center for the Rae Systems line of products, A-L Compressed Gases repairs and calibrates many other brands of gas detection equipment as well.

A-L Compressed Gases Inc., is a sister company to *CALGAZ*, a subsidiary of Air Liquide Corp. *CALGAZ* is a Calibration gas standards manufacturer located in Cambridge Maryland. All of the Calibration Gas Mixtures supplied by A-L Compressed Gases, are provided by *CALGAZ* and Comply to NIST Traceable standards. *CALGAZ* is the OEM provider of choice to many Gas Detection Manufacturers worldwide, Including Thermo GasTech, Biosystems, Mine Safety Appliance (MSA), Rae Systems and Industrial Scientific. All of our service and calibration procedures are performed in compliance with "ISO17025, GUIDE 25 for trace gases", and "ANSI Z-540-1-1994 Standards for Calibration Procedures and Documentation".

We currently provide contract repair and calibration services to large organizations in the Aviation, Aerospace and Gas Transmission and distribution industries, as well as numerous large Semi-Conductor and Silicon Wafer manufacturers. I would like to discuss with you, how we may provide the highest level of Gas Detection Calibration Services, Respiratory Services, and Training to your organization. If I may be of further assistance, please do not hesitate to call.

Sincerely,
Robert K. Sant
Technical Products Manager
A-L Compressed Gases Inc.
