

How Fun Is Made

Introducing SkateWave™

Is your community ready for a little fun? Build it. We're SkateWave and the ramps, rails and fun boxes within our Modular Skatepark System are the building blocks for creating the ideal recreational skatepark.

Our full-blown technology and full-grown engineering makes us your best choice for flexibility, durability, affordability and authentic skate-ability. That means as more and more kids in your community graduate from the seesaws and swing sets to skateboards and in-line skates, your park will keep pace and keep you happy.

When it comes to quality, SkateWave is second to none. As a division of Landscape Structures, Inc. — the leader in playground equipment — you can be sure each component we offer is built-to-last.

As kids grow up, parks must keep pace. Join in, the fun is just beginning.
