TacTronix is an engineering, design and manufacturing company with a focus on high-tech electronic tactical and surveillance products. Our principals have over 40 years active field and design experience in intelligence gathering.

Our clients have included the US Secret Service, CIA, FBI, US Diplomatic Security Services, IRS, US Border Patrol, Canadian CSIS and many foreign government services worldwide. We also create and provide equipment and expertise for many state and local agencies as well. The company also participates and provides tactical surveillance training for various agencies.

In the private sector our clientele includes private and corporate security and protection teams, corporate security installations, private estates and diplomatic properties and casino security systems.

For a quotation or to discuss your project or concept please call or [email us](#).
