

Mission Statement

“Thermo-Trol Systems sets the standard for our industry, ensuring superior products and services at competitive prices”

COMPANY SUMMARY

Thermo-Trol Systems has been in business in the Tidewater Area since 1967. Thermo-Trol prides itself on its expert ability to custom design process control & temperature control systems. Thermo-Trol provides a full range of Industrial, Mechanical, HVAC and Temperature Control services including Estimating, Engineering, Manufacturing, Upgrading, & providing Service & Maintenance.

DIVISIONS

Thermo-Trol is divided into the following divisions:

Main Divisions

- Mechanical Equipment Sales
- Temperature Control Systems
- UL Listed® Control Panel Manufacturing
- Systems Integration & Industrial Equipment Manufacturing

Support Divisions

- Mechanical & Control Systems Maintenance & Service
- Parts Department

Thermo-Trol Systems' efforts, in being an

“Equipment & Control Systems Integrator”

results in an innovative solution that causes equipment and components to interact and communicate as one seamless system.

PRODUCTS & SERVICES

At Thermo-Trol Systems we are committed to providing the “Ultimate Customer Experience” with

- ☐ High Quality Products
- ☐ 24 Hour Emergency Service
- ☐ Superior Customer Service
- ☐ Building Solid Customer Relationships

CONTROL PANEL MANUFACTURING

Thermo-Trol Systems designs and manufactures OEM (Original Equipment Manufacturing) control panels for Industrial and Commercial process control systems. Thermo-Trol Systems provides all Sales, Engineering, Programming, manufacturing, and start-up servicing of these control panels.

Thermo-Trol Systems travels onsite to learn about the potential customer's process for manufacturing their product. Together Thermo-Trol and the customer define the needs for the process control panel. Thermo-Trol then creates a layout and bill of material according to the customer's specifications, develops a proposal, and ultimately manufactures the panel for the client. These control panel systems are provided for water treatment facilities, wastewater treatment plants, chemical process manufacturers, as well as many other process and manufacturing industrial clients. Thermo-Trol's control panels can be UL & UL-c

Listed® when manufactured to the UL-508A standard.

EQUIPMENT MANUFACTURING

This division is a progressive evolution from the Control Panel Manufacturing Division. While still maintaining its customer base Thermo-Trol has expanded upon the Panel Manufacturing Division by adding equipment design and manufacturing. This division provides a total one-source solution to the customer. Thermo-Trol studies the customer's manufacturing process and not only provides a process control panel, it now furnishes all of the equipment. Thermo-Trol can design, build, install, and supply start-up services for any of its customized equipment.

EQUIPMENT SALES

Thermo-Trol Systems is a manufacturers' representative for McQuay, Environmental Technologies, as well as many other Mechanical Heating, Ventilating, and Air Conditioning products. As a full-service provider for its customers, Thermo-Trol Systems works with mechanical engineers to assist in the design of HVAC Systems for commercial & industrial buildings. Thermo-Trol Systems provides its mechanical contractors and customers with sales, product assistance, mechanical start-up and service.

TEMPERATURE CONTROL SYSTEMS & EQUIPMENT

Thermo-Trol Systems represents Alerton, Tridium and Honeywell systems. Thermo-Trol can put together temperature controls systems for any size business facility. These systems are energy efficient and provide significant cost savings for our consumers. All of these companies are recognized throughout the world as leading manufacturers of temperature control

and Direct Digital Control equipment. This division designs and integrates controls into HVAC equipment. It also services temperature controls and energy management systems for small and large commercial and industrial facilities.

WARRANTY & UPGRADE PARTS

The Parts Department provides new, replacement, and warranty parts for all systems sold by Thermo-Trol Systems and most other manufacturers. This Division also provides parts for upgrading current systems.

SERVICE & MAINTENANCE

The company's Service Division provides after warranty service and maintenance for all products and systems related to HVAC mechanical systems, temperature control systems, as well as other types of industrial control systems.

START UP SERVICES & TRAINING

Thermo-Trol's trained personnel will go on-site to get your control system up and running. Thermo-Trol also offers training on its products at our newly established state-of-the-art facility which accommodates up to twenty-four people.
