Total IT Solutions

Triangle Technology combines experienced information technology professionals, top technical expertise, timely client communication, innovative technologies, and proven implementation skills to deliver **successful solutions on time and under budget.** Our highly skilled core team and the services of a tightly integrated network of consultants will provide your business with the resources needed to achieve your IT goals. **Triangle Technology - Exceptional Talent, Innovative Solutions.**

IT CONSULTING SERVICES

Expand your resources by leveraging the intellectual capital and success driven processes of Triangle Technology. From a single consultant to an entire implementation team, we can provide the resources needed for success. Our consultants have a broad background in architecture and design, project management, software development, business analysis, system administration, and network engineering. Our proven project management methodology will ensure the successful implementation of your complex technology objectives. **High service levels and cost effective solutions are what you can expect from our award winning team.**

CUSTOM STAFFING SOLUTIONS

The foundation of our success is built on providing technology's best hiring solutions. Seasoned recruiting experts, intensive prescreening and technical skills verification processes, and an in-depth understanding of our client's requirements enable us to consistently deliver the industry's best talent. Whether your next mission critical hire is a CTO, a team of quality assurance specialists, an ERP implementer, or an industry specific developer, Triangle's Strategic Hiring Plan can be customized to meet your organization's unique staffing requirements. **Performance is not only our goal, it is what we deliver!**
