

UEC Automation, LLC specializes in Industrial Automation, Control Systems Integration and Automatic Test. Our goal is to improve our customers’ productivity and safety by designing, fabricating and integrating reliable and efficient automated machinery and control systems and by providing responsive on-site service for troubleshooting, repair, and upgrading of industrial equipment.

UEC Automation benefits our customers by:

- Providing Responsive Service
- Increasing Machine Efficiency
- Reducing Injuries
- Reducing Scrap
- Detecting Product Defects
- Improving Machine Up-Time

We strive to provide a positive open rapport with our customers to ensure that all expectations of price, quality, and delivery are met or exceeded. Our skilled technical staff and well-equipped service department are capable of providing products and services ranging from basic machine upgrades up through complex automated machines and computer control systems. Our reputation is founded on the integrity of our products and services and our ability to provide timely, cost effective solutions to the needs of our customers. As such, **UEC Automation** is operating to an **ISO 9001:2000** Quality Management System which is consistent with our never ending commitment to total customer satisfaction.

UEC Automation is an ISO 9001:2000 Certified Company
