VSAT Global Broadband Internet Access

Serving your satellite communication
needs around the world

Tel: 801-501-9090

Broadband Data, Voice, and Internet service.

New state of the art broadband IP network and voice service to any location in the 50 states, Mexico, Central America, and the Caribbean. Our Time Division Multiple Access network gives you high speed reliable service at affordable prices. Seamlessly connect your Wide Area Network and allocate bandwidth for each location to improve performance and maximize bandwidth utilization. You can reduce costs with dynamic bandwidth allocation to increase network utilization ratios.

NetModem II™
Broadband Router

- Remotely configured Service
- Immediate availability
- Turbo Satellite encoding for improved reliability and performance
- Reduced latency with TCP/IP acceleration, included with each service
- 24/7 Support
- Highest bi-directional TDMA data rates available today.

Fast Affordable Option

Lyman Bros. shared network system greatly reduces cost compared to traditional SCPC satellite connectivity. Data rates are available from 11.2 Mbps downstream and 5.75 Mbps upstream to assure service that can grow with your needs. We offer direct connection to the Internet backbone.

Installation can be scheduled within days and completed in approximately four hours at your site. The satellite dish can be placed on your roof or at a ground location. The indoor equipment is only 1"x 10" and can be placed on a desk or equipment shelf.

Voice/Video over IP

With Lyman Bros. you can have quality voice over IP service at an affordable price. We also have very competitive long distance rates. You can reduce the cost of long distance and line connection to your remote locations .

Remote Install for Voice and
Data Service

Fast Install,
Scalable So-
lution.

Installation is available immediately. No waiting for local loop service or wire line service engineering. A small VSAT dish is mounted to the roof of your facility and con-

nected by a coaxial cable to a NetModem II™ that is integrated into your LAN through a standard Ethernet port.

Transportable Satellite System

We offer emergency service trailer mounted systems that include voice and data for disaster recovery or contingency planning. We can place from 64 kbps to many megabits of data to your site in a few short hours.
