## Why Agency?

Question: Doesn't it cost a lot to hire through an agency? The managers will never want to spend the money.

**Answer:** What do you spend your money on now? Here are a few examples:

Advertising: \$500/week
Recruiting: \$3000+/month
Personnel, Benefits, Accounting: \$3000+/month
Nurses Pay: \$3300+/month
Your Time: \$Priceless
Total / Month \$11,300++++

What about turnover? Training? Mentorship? The peace of mind that your staffing needs are taken care of? Our current client list includes many of the large medical facilities in the Central Texas area. These are financially conscious companies that have found hiring through Triangle MedStaff to be both more cost and time efficient!

Question: I get plenty of responses to my ads, so why would I want to pay an agency for a candidate when I can find so many on my own?

Answer: Often, candidates responding to ads are "searching" for a job because they are unemployed or are not meeting performance requirements at their current position. Statistics show that happy, productive employees do not search the classifieds. Triangle MedStaff has a staff of full-time healthcare recruiters dedicated to finding those exceptional candidates that are not actively searching the classifieds.

Question: When considering an agency, why would I decide to go with Triangle MedStaff?

**Answer:** The staff at Triangle MedStaff has years of experience focusing exclusively on healthcare. We are aware of the daily issues facing your practice, such as HIPAA and reimbursement struggles. We thoroughly screen our candidate's previous work history and criminal background to ensure they are the right fit for a healthcare practice.
