

The new *Shape* of Cloth Media Filtration

Aqua Diamond™

Cloth media filtration for larger flows and retrofit applications.

From the leader in cloth media filtration comes yet another filtration solution - the AquaDiamond™. The unique shape and design of this filter allows you to take advantage of the inherent characteristics of cloth media technology with the added benefit of treating flows greater than 9 MGD.

The AquaDiamond™ is ideal for new plant construction or retrofitting existing traveling bridge filters.

Aqua-Aerobic is everywhere...
Everywhere You Are.

The Cloth Media Family of Products Exclusively from Aqua-Aerobic Systems:

AquaDisk®

- Higher quality effluent
- Lower backwash rates
- Capable of maintaining effluent quality at high solids loading and high hydraulic loading rates
- Reuse quality effluent
- Continuous filtration during backwash
- Small footprint
- Eliminates sand media and underdrains
- Expandability

Aqua MiniDisk™

This unit incorporates all the features and benefits of the larger scale AquaDisk® filter with one difference... *it's a fraction of the size.*

AquaDrum™

- Low hydraulic profile
- All stainless steel construction
- Simple controls
- Low maintenance
- Proven cloth media performance
- Low backwash rates
- On-demand backwash
- Small footprint
- Reuse quality effluent
