**ARTIST STATEMENT:**

“My art is inspired from my travels and primarily expresses the unique views of architecture or geometric lines and shapes that I love to see and portray.”

# DONNA CORLESS

Donna has been creative since her early childhood. She came from a creative family where her mother was an artist as well as her two grandfathers. Donna won her first art award when she was 12 years old. She was raised as an Air Force dependent and had the opportunity to travel overseas with her family and lived in places like the Azores, Phillipines, Turkey and Bermuda. She was torn between business and art in school. Although, she persued a business career until 1995, she felt drawn back to her creative side. In 1999, she started to photograph her travels more seriously and in 2000 she experimented with various techniques using computer software while living in Italy. She felt compelled to integrate the technology that she had learned with her art. Now she is combining her love for creating and photography with her passion for travel to create her own collection of black & white photos, color photos, and digital artwork and imagery.

Her work reflects mostly architectural subjects where she has had an opportunity to travel and see each site in person. Donna is inspired by ancient architecture and geometric lines and shapes, but also has an interest in coastal scenes, flowers, and boats. She is passionate and excited to create pieces from her travels around the world. She shares her passion for art with her husband who is also an architect, designer and artist.
