- Childproof caps on iron-containing products
- Finished products packaged twelve to a case with dividers
- Boxes shipped to address listed above
- Special Bottling and Packaging Requests

List of Ingredients

Amount in one tablet or capsule.

Example: Vitamin A (from retinyl palmitate) 2500 IU

Attach list with name of each ingredient as it will read on the final label, amount of ingredient, and other specifications, such as "natural vitamin E," standardized constituents, etc. If product isn't developed, describe the type of product you would like us to develop, with as much detail as possible. Indicate which ingredients, if any, you will be supplying. We require certificates of analysis for each ingredient that you supply. If this is a current, developed product, please specify amounts of "Other Ingredients" such as tableting ingredients. If this is not a current product, specify any preferences you might have for fillers or tableting ingredients, if any.

Please include company name and product name on the list.
